

TICAD 8 Tunis Plan of Actions
Actions for Implementation of TICAD 8 Tunis Plan of Actions

We encourage all TICAD partners to take measures / initiatives in line with the actions listed below. As an evolving document, TICAD partners are invited to list their measures / initiatives and update on the status of those measures / initiatives in the respective column.

(*1)(*2)(*3) indicate identical measures / initiatives with identical target population

Pillar I: Economy					
A) Focus Areas	B) Actions	C) Actors	D) Measures / Initiatives	E) Expected Outcomes	F) Result/State of Progress
1.1 Promote economic diversification and industrialization and competitiveness and ensure sustainable financing practices Corresponding AU flagship initiatives: - Establishment of the African Continental Free Trade Area (AfCFTA); - Formulation of an African Commodities Strategy; - Establishment of the African Financial Institutions;	a) Expand digital economy, including digital infrastructure, digital entrepreneurship, innovation and space applications for development	Japan	Support for formulation of digital public goods	Innovation in public and private sectors will be accelerated.	-A survey was conducted to highlight the demand in African countries on introduction of digital infrastructure and analyze the possible cooperation in this area.
		Japan	Pitch events (Africa Innovation Initiative)	Matching of African start-ups and Japanese companies will be promoted.	-JETRO dispatched a business mission from Japan to visit events on startups and accelerators in Africa. -JETRO has held webinars and provided Japanese companies with information on Africa about current situation of startups and business opportunities. -JICA launched "Next Innovation with Japan" (NINJA) initiative in 2020, aiming to promote African start-ups and innovative business. Japanese investors joined the NINJA business competition event February 2021 to offer finance and partnership opportunities. - JICA held another 5 events about African start-ups and dispatched experts in 4 countries in FY2021.
		Japan	Promote digitalization including cyber security and data privacy through trust funds of World Bank and IFC	Technical assistance for advisory services and capacity building will be provided to African countries.	
		AU - African Capacity Building Foundation	Assessing the preparedness of African countries to implement the AfCFTA in terms of	Capacity Needs Assessment report produced to guide interventions in support of the AfCFTA including	No activity carried out because of lack of funds

<ul style="list-style-type: none"> - Implementation of STISA 2024; - Africa Outer Space Strategy; - Cyber Security; - AU Strategy for Gender Equality & Women's Empowerment 2018-2028 			policy frameworks as well as individual and institutional capacity	its Secretariat to be hosted by Ghana	
		The World Bank Group and African Union	The WBG Digital Economy for Africa (DE4A) flagship initiative supports the African Union digital transformation strategy for Africa. The DE4A initiative recognizes that the digital economy can help accelerating the achievement of the African Union Agenda 2063, UN Sustainable Development Goals (SDGs) and the World Bank Group's twin goals.	Universal access by 2030	In FY22 WB projects for a total commitment of \$2.1 billion in IBRD and IDA lending approved for digital development.
		United Nations OSAA	Advocacy and support for platforms to foster dialogue and cooperation for digital inclusion	Commitments made by African countries and partners to promote digital inclusion.	On 15 July 2021, UN-OSAA in collaboration with UNECA, IDEP and UNDP co-organized the fourth annual Africa Day at HLPF 2021 under the theme: "The Green Recovery: Renewable Energy, Digitalization and Nature-based Solutions for Inclusion and Resilience in Africa". The event promoted key recommendations to advocate for the ways renewable energy and digital technologies can be utilized to accelerate progress on the implementation of the Sustainable Development Goals (SDGs) and Agenda 2063, especially with a view to ensuring greater inclusivity, health, resilience, and peace in Africa. https://www.un.org/osaa/events/africa-day-high-level-political-forum-sustainable-development-15-july-2021-8am-est

		United Nations OSAA	Promote Advocacy and support for platforms to foster dialogue and cooperation for digital inclusion	Commitments made by African countries and partners to promote digital inclusion	On 16 July 2020, UN-OSAA, UNECA, IDEP and UNDP, co-organized the third annual Africa Day at HLPF 2020 under the theme: Leveraging Digital Technology in the Context of COVID-19: An Inclusive, Healthy, Resilient and Peaceful Africa. The event promoted key recommendations to advocate and foster dialogue on digital inclusion by mobilizing strong leadership and clear vision to steer investments to expand the necessary digital infrastructure to leverage the emerging digital ecosystem across Africa as a multiplier of growth.
		UNDP	Support to innovation, youth human capital development and entrepreneurship development in response to requests from African countries and regional institutions	Initiatives to enhance digital solutions and entrepreneurship for youth employment implemented	"The YouthConnekt programme with support from the Regional youth team has to date reached 28 member countries who implement the model to their specific national context. In 2021, YouthConnekt held its 4th annual continental summit in Accra, Ghana convening over 3,000 physical participants and more virtually. The project has now established the YouthConnekt Africa Hub in Rwanda that leads on the overall coordination of the initiative with support from UNDP. UNDP Regional Youth Team continues to support the AU Youth Africa Program on Innovation and Entrepreneurship (YAPIE) through the joint implementation of a podcast series that serves to facilitate increased dialogue among a wide range of stakeholders involved in youth development. In 2022 UNDP expanded in collaboration with the Tony Elumelu Foundation to launch an EU funded entrepreneurship programme in Rwanda. "
		WFP	Launch of the WFP Innovation Hub for Eastern Africa	Identify, pilot and scale innovations for zero hunger in eastern Africa. Aims to localize the solutions and to harness synergies between the private sector and WFP operations	The Hub launched food systems innovation programs to provide funding and technical assistance for local entrepreneurs in South Sudan, Uganda and Rwanda this year and supported internal WFP projects to reduce aflatoxin contamination in Kenya. Innovation in the region was accelerated with diverse partnerships with UN agencies, NGOs, start-ups, and private sector.

		UNITAR	Online training modules on entrepreneurship, private sector development, digital finance, digital upskilling, financial inclusion, microfinance, and leadership in partnership with UNDP, African RECs, FAO, AGFUND, and others).	Provide hard /soft skilling to participants so economic activities are diversified, ecosystems become more catalytic, and human capital is more developed. - Ecosystems catalytic to SMEs and entrepreneurship created and nurtured - Community of practitioners established and expanded - Human resources to capture business opportunities and build back better enhanced	Some of the key results are highlighted below: - Knowledge of trade and food security enhanced through training (Close to 800 people from Francophone countries in Africa participated) - Knowledge of microfinance and financial inclusion enhanced through training (Close to 650 people participated from Sub-Saharan African countries) - Knowledge of entrepreneurship and women's empowerment enhanced through training (Close to 200 women from countries in the Horn of Africa (Kenya, Ethiopia, Sudan and Somalia) participated) - Action plans to initiate entrepreneurship in Africa developed - Community of practitioners on microfinance, financial inclusion, entrepreneurship, trade and food security established and expanded.
		UNITAR	The Entrepreneurship programme in partnership with UNDP Ethiopia, and four Regional Economic Communities in Africa, has been initiated. Completed comprehensive needs assessment, presently at content development stage	Prepare women entrepreneurs in Africa with the skills and knowledge of entrepreneurship and financial literacy to address barriers to entering predominantly male-dominated fields/markets which include energy, construction, maritime, IT, climate science, agriculture, livestock, whilst also building the resilience of women to climate change and public health disasters.	This initiative is currently supported by 50 countries through four regional economic communities (RECs), namely, the Intergovernmental Authority on Development (IGAD); the Southern African Develop Community (SADC); the Economic Community of West African States (ECOWAS); and the Economic Community of Central African States (ECCAS). Our strong partnership with UNDP, Ethiopia, and the completion of the Training Needs Assessment in the region enhanced our engagement with local partners and key players working in the field of finance, entrepreneurship, agricultural development, education, and private sectors.

		Long Term Industrial Development Co.Ltd.	Providing a distribution network through ride-sharing with a free app. In the future, all functions of "finance" and "distribution" will be implemented in the app.	To offer a simple rideshare application for farmers to find available drivers for their transportations of their crops to the markets.	Long Term Industrial Development (LTID) is partnering with Nippon Biodiesel Fuel (NBF). The first version of the rideshare application has been completed and is supposed to be implemented through NBF soon.
b) Support Africa's productivity, industrialization and trade policies	Japan	Capacity building through technical cooperation including Kaizen Initiatives, human resource training centers and contribution to AfDB trust fund (*1)	140,000 people will be trained to diversify industries in areas such as innovation, agriculture, blue economy and others.	-METI and AOTS provided trainings to 299 workers for Japanese-affiliated or local companies in FY2021. -AfDB Trust Fund provided business guidance to 196 SMEs, business advice to 4,085 people, and offered 23 people scholarships through Japan Africa Dream Scholarship Programme. -9 people participated in GLOPAC Fellowship Program, the training for financial regulators/supervisors by FSA, in FY2019-FY2021. -Over 304,000 people received trainings for industrial development supported by JICA in FY2019-FY2021; over 78,000 people received trainings through Kaizen Initiative; 40 students joined master's course and conducted internship under the KIZUNA Programme; CARD, SHEP, blue economy, and ABE initiative were conducted.	
	African Union Commission, African countries, Triple Initiative (AAA), Other partners...	The Initiative for the Adaptation of African Agriculture (Triple A), aims at addressing the vulnerability of Africa and its agriculture to climate change. Its objective is to enhance agricultural production in a sustainable manner.	To enhance agriculture production in a sustainable manner and contribute to continental food security in the face of climate threats.	The AAA initiative is currently supported by 38 African countries and a strong coalition of international partners from the finance, agricultural development, scientific research and private sectors. The first project concerns adaptation to climate change in oasis areas, benefiting approximately 40,000 beneficiaries. The second project concerns the development of the argan sector in three vulnerable regions of Morocco (Souss-Massa, Marrakech-Safi and Guelmim-Oued Noun). This project, which targets more than 26,000 beneficiaries, plays a role in both adaptation to climate change and mitigation of greenhouse gases, and contributes to the achievement of the objectives of the commitments made by Morocco under the "Nationally Determined Conditions" (NDC). https://www.aaainitiative.org/fr/projets	

		AU – AUDA-NEPAD	Industrial policy and development for enhancing technology in accelerating Africa’s industrialisation	1) Initiatives to support Africa’s industrialisation developed and implemented in alignment with key continental aspirations; 2) Development and implementation of flagship initiatives for improved manufacturing, productivity and trade in Africa including in sectors such as:Sustainable Blue Economy; Tradeable Services (tourism, ICT); Extractive Industries; etc.	1) AUDA-NEPAD Industrialisation Strategy and resource mobilisation plan to support Africa’s industrialisation developed for implementation by the Industrialisation Division; 2) Programme and project concept documents developed for: Sustainable Blue Economy; Tradeable Services (tourism); Extractive Industries; 3) Implementation of flagship initiatives on African productivity and quality enhancement and on MSME support for pandemic resilience
		The World Bank Group and AUC	Support governments develop and implement policies that are conducive to growth, better jobs, support the development of strong private sector. Support for AFCFTA in response to requests from African countries and AUC	Trade is an engine of growth that creates better jobs, reduces poverty, and increases economic opportunity. Trade is also linked to higher female labor participation	WB \$535 million in IBRD and IDA financed projects approved in FY22

		United Nations OSAA	Advocacy for AfCFTA implementation and global support, and monitor impact	Projects implemented by Africa Member States, institutions and partners in support of AfCFTA and reported in the UNMM	On 9 December 2021, OSAA in collaboration with UNCTAD organized a webinar to launch UNCTAD's flagship report, the Economic Development in Africa 2021 "Reaping the Potential Benefits of the African Continental Free Trade Area for Inclusive Growth." The report aims to equip African governments and development partners with knowledge on how the AfCFTA can be beneficial for inclusive growth and help realize Africa's untapped export potential. The webinar provided a global platform to discuss the challenges, opportunities, and policy implications in implementing the AfCFTA, including the challenges and impact of COVID-19, intra-African trade, informal cross-border trade, export diversification, cost-efficient trade measures, and inclusive growth in Africa, among others.
		UNDP	Support reinforcement of capacities for trade facilitation, diversification and value chains development	Economic diversification and inclusive structural transformation programmes implemented	Under the UNDP 2.0 renewed offer, Technical and advisory support was provided to COs in RBA to support the following two areas: 1) SDG Joint Fund: The ASFH PSSI unit supported the successful submission of a project under the UN SDG Joint Fund Component 2 in partnership with UNICEF and UNCDF. The project aims at restructuring the existing UNICEF Basic Sanitation Fund into a Blended Fund complemented by a Technical Assistance Facility. SDGJF allocation 6.57M\$, anticipated leverage 1:5.2) SDG Investor Maps: Following the pioneering launch of the South Africa SDG Investor Map, 13 other countries followed suit, with a total of 9 SDG Investor Maps completed and 5 under development. Increasingly efforts are being steered towards operationalizing the maps and concretizing investments. UNDP CO South Africa and Ghana organized B2B meeting with Japanese private sector to present SDG Investor Map target Opportunities

		UNDP	Trade facilitation in Morocco: 1) Review of performance of Trade/Transport Digitalization - through Moroccan Single Window/PortNet for trade facilitation and digitalization of processing of trade procedures. 2) Promotion of exports of agricultural products, including Argan Oil derivative products and local products 3) Review of market access for trade in services in three sectors.	1) Integrated and upgraded Moroccan National Single Window (PortNet). 2) Better livelihoods for local communities where the production of Argan oil and similar agricultural products takes place. 3) Promotion of market access for the export of Moroccan services (i.e., in banking, transport, education).	The project closed in March 2022. The latest deliverables related to the Morocco component are: 1) The assessment of the Moroccan Single Window/PortNet informed the dematerialization of border control in line with the upgraded protocol of PAFTA. 2) 16 Moroccan women-led argan oil cooperatives benefited from capacity development (a communication plan for their products, marketing support, product innovation, and labelling) to access the US market.
		UNDP	Support preparatory of AfCFTA Women in Trade Protocol	To enhance women's meaningful participation in inter-regional trade	UNDP is supporting the AfCFTA Secretariat to develop the AfCFTA Women in Trade Protocol in partnership with UN Women. Through the national consultations in 26 RBA countries, women traders were offered a platform to voice their challenges and propose solutions to strengthen their capacities to maximize benefits from market openings and other opportunities in the AfCFTA and to inform the women in trade protocol. Over 1,600 stakeholders participated in the national consultations. As a result, voices of women across Africa on how to make a Women in Trade Protocol work for development were consolidated into THE HEARTBEAT OF TRADE IN AFRICA, A Draft Regional Report capturing findings from National Consultations, from the Online Survey (led by UN Women) and information from Intra-Africa. The findings from the National consultation will inform the Development of the Protocol on

					Women in Trade.
		UNIDO, Relevant ministries in the beneficiary countries (Senegal, Ethiopia); BMZ (Germany)	Identified countries of interest: Ethiopia and Senegal, special emphasis on agribusiness value chains. Objectives: i) job creation, ii) provide training and skills development, and iii) stimulate private sector investment.	<ul style="list-style-type: none"> • 2,800 jobs created; • Industrial networks involving an innovative approach to job creation developed; • Transfer of investments and human resources from agriculture to agro-industries; • Enabling business environment promoted; • Healthy business practices adopted; • Provision of support services by institutions increased; • Relevant legal and policy mechanisms integrated into national policies. 	<ul style="list-style-type: none"> • 2,800 new jobs created in Ethiopia and Senegal, including 1,400 for young women; • Industrial networks involving an innovative approach to job creation developed; • A transfer of investments and human resources from agriculture to agro-industries stimulated. For more details: https://open.unido.org/projects/C6/projects/190092

Reforms to promote a more gender-sensitive business environment promoted; • A MENA women Business Club established; • Technical capacities of at least 6 000 beneficiaries, including at least 60% women, strengthened; • At least 250 women-led businesses in selected value chain supported throughout business creation and growth per country (average).	<ul style="list-style-type: none"> • 3 Country action plans formulated; • 3 Gender-sensitive mappings of value chains conducted; • 1 regional survey on access and use of ICT by women entrepreneurs in the manufacturing sector conducted; • 2 gender-sensitive mappings of Access to finance conducted (Tunisia and Morocco); • 1 survey on the impact of the COVID-19 pandemic on women-led businesses conducted; • The 2020 Women in Industry and Innovation Conference organized; • The 2020 Women Leadership Forum organized in partnership with the European Brand Institute; • 3 business networking sessions organized within the Limitless Conference, with participation of 80 female leaders in each. For more details: https://open.unido.org/projects/C6/projects/170136
		UNIDO, South African Department of Trade and Industry (DTI), Trade & Industrial Policy Strategies (TIPS)	Develop capacities of high-level policymakers from SADC Region on development economics and industrial policy through intensive discussion, exposure to emerging and successful processes in industrialized and industrializing economies.	<ul style="list-style-type: none"> • Policies designed and/or re-oriented towards inclusive and sustainable industrial development goals; • Methodological approaches for designing and implementing gender sensitive and sustainable industrial strategies and policies understood and utilized; • Capacity of policy implementers to design, implement and evaluate industrial policies strengthened. 	<ul style="list-style-type: none"> • 75 high-level policymakers from SADC member states trained in the course of three events; • A critical platform for industrial policymakers in the SADC region to engage and drive the industrialization agenda created through partnership with DTI and TIPS; • A significant number of policymakers continuously attracted, which shows South Africa's desire to contribute to capacity building in the area of industrial policy; • International economists and public policy experts such as Mushtaq Khan, Ha-Joon Chang and Chris Cramer, among others, attracted to the programme. • Contributing to successful implementation of the SADC industrialization strategy and roadmap through capacity building activities. More details: https://open.unido.org/projects/M2/projects/170083

		UNIDO, ECOWAS Commission	Objective: support the implementation of the regional quality policy of ECOWAS, aiming at “establishing a framework for the development and operation of suitable, relevant, efficient and effective quality infrastructures”.	<ul style="list-style-type: none"> • National quality policies are in line with the regional quality policy and implemented; • An operational regional standards harmonization system established; • Access to a network of accredited and competitive conformity assessment services provided in the region; • A regional certification scheme and a regional “ECOWAS Product Certification Mark” is established, promoted, and used. 	<ul style="list-style-type: none"> • 16 West African countries aligned their national quality policies with the regional policy ECOQUAL; • 10 national quality policies adopted; • 94 standards adopted by 6 technical committees of the standards harmonization mechanism; • 15 Conformity Assessment Bodies (CABs) accredited against ISO 17025; • More than 4400 people trained in quality. More details: https://open.unido.org/projects/M2/projects/140203
		UNIDO	To contribute and support Africa's industrializations in the framework of the Third Industrial development Decade for Africa (IDDA III)(2016-2025) by organizing global forums, finalizing/validating the IDDA III Joint Roadmap, etc	Increased industrial development activities in the continent through enhanced collaboration among key IDDA III stakeholders.	Joint IDDA III projects and programmes under development with key IDDA III partners including African Industry Observatory (AIO). e.g. Mapping of Regional Value Chains, Common African Agro-Parks (CAAPs) Programme, Joint Industrialization Cooperation Programme between Zambia and Zimbabwe, etc; - Progress Report to the UNGA under preparation on IDDA III Implementation in 2022; - Ongoing comprehensive overview of Africa-centred programmes and projects; - Expansion of the IDDA III Champions Initiative to currently 10 Presidents/Heads of State; - Ongoing staffing of the IDDA III Secretariat; - Events organised: IDDA III Focal Points Workshop (Sep 2021, virtual); IDDA III High Level Event at UNGA (Sep 2021, NY USA); Africa Industrialization Week co-organized (Nov 2021)
		UNIDO, AUC	Provide support to the AUC and its Department of Trade and Industry (DTI) to establish and operationalize an	Key actors in the implementation of the AIDA Action Plan remain engaged/committed and are supported in their	Development of UNIDO Roadmap for Implementation of IDDA III; - IDDA III High Level Event organized in the margins of UNGA in Sep 2017, NY USA; - IDDA Event organized in the margins of UNIDO General Conference in Nov 2017, NY USA; - EIB Africa Day organized with European Investment Bank in Nov 2017, Addis Ababa, Ethiopia; - Preparation of Progress Report on IDDA III

			Implementation Coordination Unit (ICU) under the AUC/DTI within the framework of AIDA and African Union's Agenda 2063.	efforts to translate it into concrete actionable activities; - Well-functioning and sustained campaign for the mobilization and development of both financial and non-financial resources (technological capacities and essential skills) to support the realization of AIDA.	Implementation in July 2017 For more information: https://open.unido.org/projects/M2/projects/150361
		UNIDO, AUC, UNECA	Support the development, operationalization and implementation of programme for the Third Industrial Development Decade for Africa (IDDA III) (2016-2015)	Increased/advanced industrial development on the African continent.	MOU signed with: AUC in March 2018 for 2030 Agenda, Agenda 2063 and IDDA III; AfDB in May 2018 for collaboration on key IDDA III priority areas; - Joint Declaration signed in Dec 2018 with Afreximbank on joint cooperation in the areas of value addition, trade linkages and market access; - Progress Report on IDDA III Implementation prepared in July 2018, July 2019 and July 2020; - IDDA III High Level Event organized in the margins of UNGA in Sep 2018 and Sep 2019 in New York; - IDDA III Focal Points Workshop organized in March 2019 in Vienna and July 2019 in Geneva; - IDDA III Side Events held in the margins of TICAD7 in August 2019 in Yokohama Japan; - Launch of IDDA III Championship Initiative in Sep 2018)10 Heads of State from Burundi, Cote d'Ivoire, Egypt, Ethiopia, Ghana, Kenya, Madagascar, Nigeria, Senegal and South Africa. For more information: https://open.unido.org/projects/M2/projects/170088
		UNIDO, AUC, UNECEA, Afro-Champions	Support the preparations and to convene Africa's Summit on Industrialization and Economic Diversification, scheduled in 2022.	Africa's industrialization through implementation of Global Forum activities in the framework of the Third Industrial Development Decade for Africa (IDDA III) (2016-2025) supported.	Ongoing participation to Technical Working Group and preparation/contribution to knowledge products for the organization of AU Summit on Industrialization and Economic Diversification; - Principals meeting held to decide on key issues in AU Summit organization; - Regional Forums on IDDA III and AfCFTA under preparation in partnership with RECs; For more information: https://open.unido.org/projects/M2/projects/210233

		UNIDO, AUC, UNECA, various IDDA III partners	Objective is to support the development, operationalization and implementation of a programme for IDDA III (2016-2025); contribute to and support Africa's industrialisation through various activities within IDDA III framework.	Integration of ongoing programmes in Africa into the IDDA III implementation programme; - Enhanced cooperation with relevant African institutions (AU, RECs, etc); - development of detailed funds mobilization strategy; - Key Global Forum organized; - Joint Roadmap developed and implemented with IDDA III Partners; - Joined Programme developed and implemented; - Establishment of IDDA III Secretariat supported.	High Level Side-Event on the IDDA III implementation at UNGA in Sep 2019 in NY; preparation for African Union Summit on Industrialization and Economic Diversification; Knowledge products on Africa's industrialization developed and disseminated; Industrial development initiatives/activities developed and implemented in support of Africa's development; IDDA III joint projects and programmes developed and implemented with external stakeholders.
		UNIDO, League of Arab States (LAS), the Arab Industrial and Mining Organization (AIDMO), the Arab Organization for Agricultural Development (AOAD), the Union of Arab Chambers (UAC)	Preparatory project to develop a new project to support to enhance the regional food safety system at institutional/legislative level; upgrade selected value chains at national level; and foster regional economic integration.	Arab food safety initiative for economic integration designed in close partnership with relevant regional/international institutions through 1)Economic impact assessment to be used as basis for the formulation of a large-scale multi-agency technical programme; 2) Collaboration platform among relevant regional/international partners through	This Preparatory project is closed and follow-up programme is under development.

				application of efficient joint programme formulation mechanism.	
		ILO, Japanese Consumers' Co-operative Union (JCCU), Japan Cooperative Alliance (JCA), International Cooperative Alliance(ICA)-Africa	Since 2010, ILO and JCCU have implemented an annual study tour program for African cooperative leaders to facilitate the exchange of knowledge and experiences between African and Japanese cooperatives for their development.	To strengthen the exchange of knowledge and experiences and facilitate discussions on possible cooperation including coop-to-coop trade between African and Japanese cooperatives, and expand and replicate the program further to South-South triangular cooperation modality involving other regions such as the Middle East.	The Study Tour has received 43 senior cooperative leaders from 16 African countries (Cameroon, Côte d'Ivoire, Democratic Republic of the Congo, Eswatini, Ethiopia, Ghana, Kenya, Lesotho, Niger, Nigeria, Rwanda, South Africa, Tanzania, Tunisia, Uganda and Zimbabwe) since 2010. In September 2019 alone, the program received five participants from Kenya, Nigeria, Tanzania and Uganda and strengthened collaboration between African and Japanese cooperatives. In 2021, ILO and JCCU published a pictorial report capturing the programme achievements for the past decade. The report was shared with the African embassies in Japan as well as JICA for further collaboration. https://www.ilo.org/wcmsp5/groups/public/---ed_emp/---emp_ent/--coop/documents/publication/wcms_796653.pdf
		The Association for Overseas Technical Cooperation and Sustainable Partnerships (AOTS)	Technical cooperation through training, expert dispatch, etc. to address the needs for human resource development in Japanese companies which are expanding their business operation in developing countries.	The reinforcement of overseas bases required for overseas business expansion of Japanese companies and that would lead to the improvement of the local industry and the economical development of the partner countries.	<FY2019 - FY2021> • AOTS implemented the technical training programs and the management training programs for 858 people who work for Japanese-affiliated companies or local companies in Africa cooperating with Japanese companies. • AOTS organized the special courses to help university students to acquire advanced knowledge and technologies at universities in Burkina Faso and in the Republic of Sierra Leone as a part of the Industry-Academia collaborative program, cooperating with a Japanese company. 162 students joined the program.

c) Enhance agricultural production and food security	Japan	Collaboration with organizations including AUDA-NEPAD and partner countries in Coalition for African Rice Development (CARD)	Rice production in Sub-Saharan Africa will be doubled (from current 28 million to 56 million tons) by 2030 with enhanced rice quality through efforts by CARD partners.	-Promoting agricultural DX utilizing an IoT solution in Ethiopia in FY2021-2022. -32.9 million tons of rice was produced in Sub-Saharan Africa in 2020. -147,683 people participated in CARD capacity building programs in FY2019-FY2021.
	Japan	Smallholder Horticulture Empowerment & Promotion (SHEP)	Support for increasing income of small farmers will be provided.	-255 farmers and 4 leaders are trained at capacity building program in FY 2021. -115,762 farmers and 15,633 leaders participated in SHEP capacity building programs in FY2019-FY2021.

	Japan	Dispatch of agriculture experts	Experienced experts from Japan will be assigned in some African countries to improve agricultural techniques and develop necessary agricultural policies.	- 5 experts with years of experience in Japanese municipalities have been sent from Japan since FY2019.
	Japan	Support for global food value chain development	Africa's agriculture and food sectors will be developed in collaboration with Japanese private sector. /	-A series of public-private discussions were held regarding the improvement of food system, as the COVID-19 imposed a serious impact especially on food distribution. The Government of Japan supported private sector's efforts such as digital transformation of agriculture utilizing ICT.

				Cooperation among industry-government-academia for development of African agriculture will be enhanced.	
		Japan	Promoting agricultural production and food security with Japanese technology through the contribution to AfDB trust fund	Technical assistance for training and advisory services will be provided to African countries.	
		AU-AUC	Support sustainable mechanization and irrigation in agriculture in line with the Comprehensive African Agriculture Development Programme (CAADP).	The number of farmers using mechanization and area under sustainable irrigation increased.	Reporting is ongoing and will be shared in due course
		The World Bank Group and AUC	Support for agriculture and food security in response to requests from African countries and AUC. Promote sustainability and resilience, and reduce vulnerability of agriculture to climate change and stimulate rural employment growth on	reduced food insecurity and improved agricultural poverty, as well as rural communities livelihood.	In FY22 WB \$1.8 billion of IBRD and IDA financed projects tackling food insecurity and additional WB \$1.9 billion of IBRD and IDA financed projects for inclusive or resilient agriculture.
		United Nations OSAA	Advocacy for food security in Africa	African Member States and their partners are promoting food security in Africa	UN OSAA partnered with its Knowledge network experts in publishing an in-depth policy paper on Food security in Africa. The study made specific recommendations on ensuring rights to food and enabling system change for transformation. In May 2022, OSAA and partners organized the 2022 Africa Dialogue Series (ADS) on the

					<p>theme "Build resilience in Nutrition: accelerate human capital and socio-economic development" to echo the AU theme for the year "Strengthening resilience in nutrition and food security on the African continent: Strengthening agro-food systems, health and social protection systems for the acceleration of human, social and economic capital development". A series of one month long activities, events and webinars were organized on the following 4 sub-themes: Building Resilient Socio-Agricultural Food Systems: The Key to Nutrition; Strengthening the Resilience of Farming Systems: Land, Digital transformation, and Access to Finance – Making Small Holder Farmers the Back Bones; Advancing Nutrition and Building Resilience through Social Protection ; Human Capital Development, Climate, Energy and Food Systems</p>
		<p>UNIDO; National standards bodies; National food control authorities and relevant ministries; National institutions involved in food standards and food safety in beneficiary countries; League of Arab States (LAS); Arab Industrial Development</p>	<p>Facilitate regional trade in agri-based products, improve integration through strengthening the regional coordination and harmonization mechanisms on conformity assessment and Food Safety systems following international best practices.</p>	<ul style="list-style-type: none"> • A joint AIDMO-AOAD regional coordination and cooperation platform established and operational; • A number of regional conformity assessment and food safety standards, protocols etc. prepared and endorsed at the regional level; • Four AIDMO-AOAD member countries assisted in the implementation of the regional harmonized standards & protocols. 	<ul style="list-style-type: none"> • The Arab Task Force on Food Safety (ATF) was fully established and operational with a total of six harmonization cycles; • 41 food safety officials participated in ATF, representing more than 15 LAS member states and six regional/international institutions; • PAFTA is upgraded by the inclusion of the 4 trade files: SPS, TBT, intellectual property rights (IPR) & trade facilitation (TF); • 12 food safety professionals from 9 Arab countries fully qualified to undertake food safety risk assessments and address chemical and microbiological hazards occurring in food; • The import and export inspection and certification systems of 3 selected countries assessed and benchmarked; • Guidelines for a common Arab export and import certificate for food endorsed by the ATF; • 6 regional Codex guidelines developed and endorsed by the ATF. More details: https://open.unido.org/projects/M5/projects/120541

		and Mining Organization (AIDMO); Arab Organization for Agricultural Development (AOAD)			
		UNIDO, National Agency of Food Safety (ANSSA), Mali; Codex Alimentarius National Committee in cooperation with the Department of Plant Protection (DPV), Senegal; Standard and Trade Development Facility (STDF)	Focus on selected agri-food sectors, horticulture (Senegal) and fish (Mali). UNIDO will develop complementary food safety capacity building initiatives, cooperating with STDF and GFSI (Global Food Safety Initiative).	<ul style="list-style-type: none"> Enhanced awareness of regulatory authorities in pilot countries on how to assess and use data generated by vTPA programmes; Improved inspection capacities and food safety compliance of FBOs in selected value chains; Voluntary food safety capacity building programme developed, customized and piloted; Regional and global events on vTPA programmes organized. 	[N/A; project has just started] https://open.unido.org/projects/M2/projects/200001
		WFP	1) expansion of farm land 2) development of community infrastructures to assist production 3) build capacity of farmers organizations 4)	Enhanced production capacity built with small scale farmers, including enhanced linkage to the market.	1) 8,600 hectares of agricultural land cultivated and/or rehabilitated, making them productive for agricultural and pastoral use. 2) 278,600 meters of dikes, weirs, embankments, bunds, dams and reservoirs constructed and/or rehabilitated to improve irrigations schemes for agricultural purposes. 3) 180,700 smallholder farmers organized into 470 farmer organizations in 14 countries. 4) 303,100 mt of food (an estimated value of USD 14.1 million), were sold by the smallholder

			connect small scale farmers to markets		farmers assisted, through WFP-supported aggregation systems. 12,900 mt of local produce (worth USD 5.6 million) was purchased by WFP directly from smallholder farmers in 6 countries (Central African Republic, Chad, Cote d'Ivoire, Guinea, Mali and Niger).
	Burkina Faso	Support project for the establishment of the SOUROU agropole - 300,000,000,000 FCFA	8,500 ha are developed and enhanced and rehabilitated 3812 ha of perimeters. Value chains of agropastoral and fisheries products are developed through the establishment of complexes of infrastructures for processing, conservation, storage and marketing including the opening up of production sites jobs are created for young people and women through the establishment of businesses of the incomes of the actors (producers, processors, traders) are improved		Over the period 2016-2020. 24% of the financial mobilized. Over the period 2016-2020, the financing mobilized will make it possible to realize the following new perimeters: 1,500 ha in Bissan with financing from the World Bank (PReCA); 1270 to Dangoumana co-financing IDB (PDAD) and BM (PReCA); 2000 ha in Sono Kouri on ADF, FSD and FKDEA co-financing. A total of 4720 ha are under development. The areas developed will soon reach 11,278 ha out of a potential of 30,000 ha or at least 37.5% of development rate by 2025
	Burkina Faso	2. Project to create a Central Supply Centre for Agricultural Inputs and Equipment (CAIMA) - 266 568 199 369 FCFA	131,000 tonnes of improved seeds are mobilised to meet consumer needs, 215,000 tonnes of fertilizer are mobilized to meet the needs of consumers, 600,000 units of agricultural equipment are mobilized to meet the needs of users		Commitment of credits with the Agricultural Development Bank of Faso of 18 billion CFA francs, including 7 billion for this year. Creation of the "Central Supply of Agricultural Inputs and Equipment" abbreviated "CAIMA" in Burkina Faso in the associative form, with participation of the State in the Council of Ministers. Appointment of the Director-General in the Council of Ministers. Establishment of the Board of Directors with the appointment of its President. Installation of the DG and BCP. Advocacy mission to EBID and partners;

		Burkina Faso	Project for the Development of Agricultural Mechanization and Support for the Hydraulic Sector	<p>"1. the technologies for the assembly, operation and use of tractors and tillers shall be mastered at national level;2. an assembly unit for agricultural tractors, with an average capacity of 500 tractors per year, and other equipment (tillers, shellers, gins, threshers,...) is set up;"3. approximately 5,000 equipped tractors are placed with producers on the national territory at the end of the project; 4. a network of manufacturers of tractor accessories and other agricultural equipment (ploughs, agricultural trailers, sprayers, etc.) is set up and produces about 60% of the components;5. flexible purchasing arrangements adapted to the socio-economic conditions of producers shall be adopted to facilitate access to equipment;6. at least fifty (50) permanent jobs, one hundred (100) temporary jobs and 200 indirect jobs are created through</p>	<p>TROPIC AGRO INDUSTRIE (7,890,368,749 FCFA) and Burkinabe State (88,587,990,372 FCFA). Burkinabe company TROPIC AGRO INDUSTRIE selected for the implementation of the Project. Draft contract developed and signed. The tractor assembly unit and the 07 repair and maintenance garages will be carried out entirely at the expense of TROPIC AGRO INDUSTRIE but in return the State should undertake to acquire about 5,500 complete agricultural tractors whose cost is about 88.6 billion CFA francs.</p>
--	--	--------------	--	--	--

				<p>the installation of the assembly plant and repair garages;7. a hundred mechanics working in the activity of repairing agricultural equipment are trained and master repair techniques (hydraulic, electrical, mechanical, etc.);8. the agricultural extension and advisory support network has 300 agricultural technicians trained in the use of agricultural tractors and the management of motorised holdings and able to provide sound advice to users;</p>	
		FAO	<p>Support mitigating the immediate impacts of the COVID-19 pandemic on food security and nutrition while strengthening the long-term resilience of food systems and livelihoods</p>	<p>The immediate impacts of the pandemic on food security and nutrition are mitigated while the long-term resilience of food systems and livelihoods is strengthened</p>	<p>FAO implements the FAO COVID-19 Response and Recovery Programme in Sub-Saharan Africa, with a total budget of USD 145 million, benefiting 33 countries with priorities including: (i) Preventing next zoonotic pandemics; (ii) Trade and food safety standards, (iii) Boosting smallholder resilience for recovery; (iv) Economic Inclusion and Social Protection to Reduce Poverty; and (v) Food Systems; rolled out timely data collection and analysis to provide on-the-ground assessments and monitoring of the impact of the COVID-19 pandemic on agrifood systems and food security; developed relevant policy briefs, providing policy options for safeguarding the lives and livelihoods of the most vulnerable people, etc.</p>

		FAO	Promote inclusive and gender-responsive agrifood systems	Inclusive and gender-sensitive agrifood systems are promoted	FAO launched the FAO-ITC project “Empowering women and boosting livelihoods through agricultural trade: Leveraging the AfCFTA” to empower women producers, processors, and traders in agro-processing value chains and food systems, in the context of the AfCFTA; generated evidence on the gender responsiveness of COVID-19 national policy measures; partnering with AUC, developed investment guidelines to facilitate youth-centered investments in agriculture and agribusiness for decent employment; collaborated with UNIDO and AUC to develop and disseminate baseline reports and action plans for implementation of youth entrepreneurship and agribusiness projects under Opportunities for Youth in Africa (OYA) Programme; developed guidance for gender-responsive service provision and business models in value chain and agribusiness.
		FAO	Support sustainable Production Intensification and Value Chain Development	Sustainable Production Intensification and Value Chain Development are enhanced	FAO supported to formulate national agricultural mechanization strategies for the operationalization of the Framework for Sustainable Agricultural Mechanization in Africa (F-SAMA) of AUC; strengthened the capacities of national stakeholders such as on Global Soil Organic Carbon Sequestration; Developed Integrated Pest Management packages to deal with Fall Armyworm infestation; provided knowledge products, including guidelines for the development and harmonization of food control systems and trade facilitation programmes in the light of AfCFTA; provided publications to support AU’s framework and actions such as on food grain research and development, and irrigation development and agricultural water management, etc.
		FAO	Support Africa’s Commitment to End Hunger by 2025	Africa’s Commitment to End Hunger by 2025 is advanced	FAO provided policy papers, analytical frameworks and other knowledge products to the AUC, RECs and member countries for the CAADP country processes among others, including formulation, implementation, monitoring and reporting of the second generation of NAIPs/RAIPs, supported the organization of policy dialogues, strengthened national and regional institutional capacities for knowledge and data generation, and management for the implementation of the relevant Malabo Declaration commitment, supported drafting of a model law on food security and nutrition, supported in developing systems for collecting, processing and disseminating agricultural, food security data and information, etc.

d) Support Africa's development in the Blue Economy	Japan	Capacity building in the areas of maritime security, port capacity enhancement and sustainable marine resource management	1,000 people will be trained in 3 years. / Maritime security and safety will be enhanced. / Port facilities and management/operations are expected to improve. / Ensuring sustainable use of marine resources.	-ICCAT provided a training of sustainable management of marine resource for 103 people in coastal countries.-Overseas Fishery Cooperation Foundation of Japan accepted 13 trainees and provided a training on marine resource management.-JICA provided training programs for 522 people between FY2019 and FY2021 in the fields related to blue economy.
	Japan	Support for improvement in port infrastructure management and operations	Port facilities and management/operations are expected to improve.	-Between FY2019 and FY2021, Japan started 4 projects for the improvement of port facilities and development by grant and loan.
	Japan	Provision of ships and related equipment	Fishing industry will be developed and IUU fishing activities will be reduced. / Maritime security and safety will be enhanced.	-Since FY2019, Japan decided to provide maritime security and fishery equipment to 12 countries.
	Japan	Contribution to multi-layered dialogue	Multi-layered dialogue will be promoted through participation in international forum such as Indian Ocean Commission.	-Between FY2020 and FY2021, Japan has provided the IOC a grant of more than \$875,000 to through Enhancing Maritime Connectivity Project (EMCP). -Japan participated in the IOC 35th and 36th Council of Ministers as an observer.
	AU-AUC	Support to Member States in the development of Blue Economy Policies and implementation of initiatives	Policies on Blue Economies are developed and initiatives implemented.	The Africa Blue Economy, the Impelmentation plan and framework for blue governance have been developed. Awareness enhanced among AU member states and other stakeholders on blue concept and governance. 10 AU member states and 3 RECs have been identified for support for development of their National and Regional blue economy strategies. The TORs developed, advertized and the consultants to provide the technical assistance to review and align their policies with the Africa Blue Economic Strategies have been identified. Their final recruitment is pending clearance by Human Resource Manegement.

		AU-AUC	Support water resources management in African River/Lake Basin Organization and Water Centres of Excellence.	African Water Vision 2025 implemented.	No activity carried out because of lack of funds
		AU-AUC	Support technical expertise and resource mobilization to prevent Lake Chad from further shrinkage	Sustainable Socio-economic use of water implemented	No activity carried out because of lack of funds
		AU – AUDA-NEPAD	Support to Member States and RECs to implement the Africa Blue Economy Strategy through targeted interventions under the AUDA-NEPAD Sustainable Blue Economy Programme to: Strengthen capacity for integrated strategic planning; Generate knowledge, analysis and research; Promote communication and advocacy to link policy to practice and promote private sector engagement	Initiatives to support Africa’s sustainable blue economy development implemented in alignment with the Africa Blue Economy Strategy • MS & regional bodies capacitated to for sustainable BE development • Knowledge for Africa’s BE generated, used and managed for evidence-based decision-making • Stakeholder engagement platforms operational • Public and private sector flows, adequately targeted and resourced • BE value chains strengthened	Support to MS & regional bodies to develop blue economy strategies and projects including: Technical Assistance to IGAD to develop Blue Economy Strategy; Technical Assistance to SADC to develop Blue Economy project to be funded by AfDB; Development of project concept around priority BE value chains developed for funding
		The World Bank Group	– Blue Economy Program and	Supporting integrated and sustainable	In FY22 \$380 million in IBRD and IDA financed projects approved for Blue Economy development.

		and AUC	PROBLUE	economic development in healthy oceans	
		UNDP	Support enhancement of African countries capacity for sustainable utilization of water resources through water governance and ecosystems management	Integrated water resource management programmes implemented	UNDP provided Technical and advisory support to the development and implementation of 79 projects related to integrated water resources management across 38 countries in Africa. The Projects on transboundary river basin and marine management used Transboundary Diagnostic Analysis/Strategic Action Programme (TDA/SAP) tool to plan and monitor the implementation of interventions. UNDP is supporting the development of new project that include Egypt for enhancing conservation of critical coral reef systems on Gulf of Aqaba and Red Sea. UNDP supported the Nubian Aquifer project for its co-management among Egypt, Libya, Sudan and Chad focused on implementation of regional Strategic Action Plan.
		FAO	Enhance the fisheries and aquaculture sector's production and productivity while supporting maritime security	The production and productivity in fisheries and aquaculture sector and the maritime security are enhanced	FAO promoted good practices in fisheries and aquaculture; developed capacities of the national stakeholders such as on the prevention of IUU fisheries; supported the implementation of the Voluntary Guidelines for Securing Sustainable Small-Scale Fisheries in the Context of Food Security and Poverty Eradication by member countries; provided capacity building support and equipment for producers and processors in the fishery and aquaculture sectors; produced knowledge materials for the policy makers etc.
1.2 Strengthen connectivity and integration through quality infrastructure investment	a) Construct and facilitate effective implementation of economic corridors	Japan	Quality infrastructure investment in line with the G20 Principles for Quality Infrastructure Investment	Development of three priority areas (East Africa Northern Corridor, Nacala Corridor and West Africa Growth Ring) will be further enhanced based on the completed master plans supported by JICA.	-Projects in all the three priority areas proceeded based on the completed master plans supported by JICA. -Japan provided loans (57.4 billion yen), grants (36.4billion yen) and technical assistance to strengthen regional connectivity between 2019 and 2021.

<p>Corresponding AU flagship initiatives:</p> <ul style="list-style-type: none"> - Establishment of a Single African Air-Transport Market (SAATM); - Integrated High Speed Train Network; - Development of Geothermal Energy Resources in Africa - Implementation of the Grand Inga Hydropower Dam; - Implementation of STISA 2024; - AU Strategy for Gender Equality & Women's Empowerment 2018-2028 	AU – AUDA-NEPAD	Support corridor development approach through PIDA	Corridor development approach will be enhanced through the development of PIDA PAP2.	Support corridor development approach through PIDA, particularly in four priority aspects: a) Capacity development in MS and RECs officials in infrastructure; b) Enhancement of private sector engagement; c) Improvement of PIDA database. ; d) Effective use of resources. Corridor development approach will be enhanced through the development of PIDA PAP2, particularly as a result of actions taken by four priority aspects:a) Multi-institutional partnership and political commitment during preparation will be enhanced.; b) Engagement with private sector will be strengthen through the series of business network meetings. ; c) Filling a data gap and building a maintenance regime to ensure the quality of PIDA database. ; d) Increasing resources and mobilizing alternative financing for each project throughout its entire life cycle.
	AU-AUC	Support development of geothermal initiatives.	Increased share of geothermal energy in the generation mix.	(a) Disbursed over \$2,000,000 to both private and public projects developers in 2020, a 20% increase in annual disbursement. (b) Launched the 6th application round. 10 out 18 Expression of Interests were pre-qualified. (c) Developed GRMF Grievance Mechanism and updated E&S regulations (d) Carried out monitoring and evaluation of 30 projects.
	AU-AUC	Support AUC to develop a harmonized regulatory framework for electricity market in Africa and to operationalize the electricity market	Operational regional and continental electricity market in Africa Capacity strengthened for institutions coordinating the electricity market	(a) AfSEM policy document and governance structure developed and adopted by the AU-summit of Head of Statea in Feb, 2021, (b) AfSEM was launched in June, 2021, (c) AfSEM Strategic Planning and Guidelines are being developed, (d) AfSEM Governance and institutional structure is being established, (e) AfSEM Five (5) Years Business Plan and Action Plan has been finalized, (f) Online data monitoring platform for the AfSEM completed and is being migrated to the AUC Server.
	The World Bank Group	Economic and transport corridors	To improve the efficiency and safety of regional trade transport and the development of economic corridors	In FY22 WB \$1 billion for economic and transport corridors projects.
	UNIDO, League of Arab States (LAS); Arab Industrial	Establishment and strengthening of regional support quality infrastructures for improvement of	• ARAC sustainable and internationally recognized as a key driving force for regional trade integration; • Up to	• Substantial growth in the ARAC membership achieved; • New association of Testing and Calibration laboratories accepted as ARAC stakeholder members and Associate members; • The process of registering ARAC as a legal entity and establishing the hosting of the ARAC secretariat accomplished by 80%; • 7 ARAC IT solutions

		Development, Standardization and Mining Organization (AIDSMO); Arab Accreditation Cooperation (ARAC)	quality, and for delivery along international good practices, of support services in standardization, conformity assessment and accreditation.	4 ARAC members supported to become internationally recognized via the ARAC MLA; • A regional pilot initiative on proficiency testing designed and implemented; • Integrated IT platforms for ARAC and its Accreditation Body members' activities developed;	developed and fully implemented; • 6 ARAC AB members implementing the developed IT module for the accreditation process workflow; • 4 ARAC AB members supported in their efforts to initiate the process of ARAC recognition for their national accreditation systems and to become new ARAC MLA signatories; • Peer evaluation process initiated for 4 ARAC new AB members; • 6 ARAC PT programmes designed and implemented. For more details: https://open.unido.org/projects/M5/projects/140261
		Burkina Faso	Construction and asphalt project of the national road n°11 (RN11) Orodara-Banfora-Gaoua- Batié-Kpouéré- Côte d'Ivoire border (365 km)- 118 625 000 000 FCFA	Connectivity across the region improved and regional trade and socioeconomic development accelerated	70,000,000,000 FCFA mobilized. Selection of the current company for the realization of the Banfora-Gaoua section (190 km).
		Burkina Faso	1. Rehabilitation and reinforcement project of the Pâ- Dano-Côte d'Ivoire border road (RN 12) (231km).- 103 950 000 000	Connectivity across the region improved and regional trade and socioeconomic development accelerated	46350000000 FCFA Procurement in progress for the section Pâ – Dano – Diébougou (103 km)

b) Improve the capacity of border logistics and authorities related to border crossing	Japan	Development of quality infrastructure and qualified communication networks including ICT and postal networks (through the UPU among others)	Connectivity across African countries will be improved, accelerating social and economic development.	<p>-The international consortium in which a Japanese company participates has launched mobile communication services in Ethiopia in FY2022.</p> <p>- Conducted researches and demonstrations on telecommunication infrastructure in DRC, Senegal, and Kenya in FY2021-22.</p> <p>-Continuously supported projects of Disaster Risk Management (DRM), Financial Inclusion, Emergency Solidarity Fund (ESF), Post4Health and E-Commerce, etc. by utilizing the Japan Fund for UPU.</p> <p>-JICA has supported development and operationalization of 14 OSBPs along Northern Corridor or North-South Transport Corridor as well as capacity building for Customs officers in East, Southern and West Africa.</p>
	Japan	Capacity building for implementing AfCFTA through technical cooperation	About 40 Master Trainers (MTs) on Rules of Origin will be developed with a view to training the private sector and the government officials to support the implementation and the utilization of AfCFTA. (FYI, MTs gave trainings more than 23,000 people in 2018-2021 on Customs matters such as HS classification.)	
	AU – AUDA-NEPAD	Support for trade facilitation through capacity development of Regional Economic Communities (RECs) and Member States for functionalization of One Stop Border Posts.	Indicators for the efficiencies of OSBPs set by MoveAfrica will be disseminated. Capacity of RECs on OSBPs will be enhanced through training for trainers (ToT) in order for the RECs to train	Support for trade facilitation through capacity development of Regional Economic Communities (RECs) and Member States for functionalization of One Stop Border Posts. Indicators for the efficiencies of OSBPs set by Move Africa is disseminated and used as a standard to compliment the AfFTA Protocols on Trade in Goods and the TFA. The Traffic Light System - TLS created by MoveAfrica is being integrated into the workstreams of the RECs and member states to be able to self-assess the border performance in line with the indicators in the TLS.

				each member states.	
		AU – AUDA-NEPAD	Support for business acceleration of African enterprises within the health sector for pandemic resilience through the Home Grown Solution Accelerator (HGS) Initiative	Increased pandemic resilience through acceleration of African Home Grown Solutions in line with the African Union's Agenda 2063 aspirations	Design, and implementation of a pilot business accelerator in the EAC involving provision of tailored acceleration planning and support for 5 companies within the health sector to improve pandemic resilience across the continent. Planning for the phased development of a scaled- up initiative to cover additional regions, countries and sectors.
		The World Bank Group and AUC	The World Bank is providing support to client countries and the AUC on the development of transport and trade corridors and support to AUC for operationalization of the Single African Air Transport Market	Improved connectivity	In FY22 \$1.2 billion for projects improving transport connectivity and an additional \$1.3 billion for other transport projects.
		World Customs Organisation (WCO)	Comprehensive support for trade facilitation, revenue collection and protection of society , especially through capacity building of Customs administrations, cooperating with	The capacity of authorities and The private sector related to border crossing will be improved. - The capacity of authorities to improve rule of law, good governance, and border management F22and surveillance will be	Projects for capacity building, trade facilitation etc., have brought tangible outcomes. For example, the WCO-JICA Master Trainer Program (MTP) had formed about 140 Master Trainers on necessary expertise such as HS classification; These Master Trainers trained more than 20,000 officers and private-sector staff in recent 3 years. Efforts for the AfCFTA includes an MOU between the WCO and the AfCFTA Secretariat MOU on further cooperation to be signed; the WCO-JICA MTP on Rules of Origin (RoO) started July 2021 to support the implementation of AfCFTA; EU-funded capacity building project on RoO is about to start.

			donors such as Japan, EU, ul, WB, UNCTAD	reinforced. - The pool of quality Trainers will be developed. - Connectivity across African countries will be improved.	
		World Customs Organisation (WCO)	Capacity Building of Customs administrations to facilitate legitimate trade, to secure a fair revenue collection and to protect society, including measures to implement the AfCFTA and to respond to disasters.	To facilitate legitimate trade, to secure a fair revenue collection and to protect society, the capacity of authorities and the private sector related to trade and border crossing will be strengthened; the pool of qualified trainers will be developed; the connectivity across African countries will be improved.	About 30 countries and international/regional organizations have made voluntary contributions to support WCO' capacity building activities including more than 15 WCO projects, which have brought tangible results: e.g, about 140 Master Trainers in Africa developed WCO/JICA Joint Project delivered trainings on Customs technical matters to more than 23,000 people of governments and the private sector in recent three years; 48 tons of precursors of explosives were seized by West and Central Africa Security Project; and WCO Anti-Corruption and Integrity Promotion Programme trained/assisted about 700 officials and developed tools used by more than 6,000 people of governments and the private sector. For details http://www.wcoomd.org/en/topics/capacity-building/activities-and-programmes.aspx http://www.wcoomd.org/en/topics/enforcement-and-compliance/activities-and-programmes.aspx
	c) Cooperate to implement the G20 Principles for Quality Infrastructure Investment	Japan	Enhanced Private Sector Assistance for Africa (EPSA) with AfDB	Japan and AfDB will continue to focus on quality infrastructure projects while improving business environment, drawing on country and regional development strategies and with due regard to the "G20 Principles for Quality Infrastructure Investment".	-Japan and the African Development Bank, under the 4th phase of the EPSA initiative, have provided 6 sovereign loans and 2 private sector equity investment, amounting to USD 2.67 billion in total.
		Japan	Assistance to sustainable urban development	Sustainable master plans will be elaborated and promoted in 4 cities expected to reach	-JICA started technical assistance projects for promoting a master plan for sustainable urban development in Abidjan and Kinshasa.

				10,000,000 population.	
		Japan	Promote quality infrastructure investment through World Bank trust funds	Technical assistance for advisory services and capacity building will be provided to African countries.	
		Japan	Development of quality health infrastructure through the contribution to AfDB trust fund	Technical assistance for advisory services and capacity building will be provided to African countries.	
		The World Bank Group	Support for adherence to G20 principles in response from African countries	WBG infrastructure programs compliant with G20 principles	WB's intervention is multi-year and long term in scope. In FY22 WB approved \$378 million for infrastructure reform.
		Toshiba Corporation Toshiba Energy Systems & Solutions Corporation Toshiba Africa PTY LTD	Supply high efficiency transformer	Improves the profitability of power transmission and distribution companies by reducing power loss in power transmission and distribution. Also, enables to increase the power supply at lower cost than constructing a new power plant.	We have supplied around 40,000 high-efficiency transformers to 16 African countries. Will continue to explain the benefits, such as reduction of distribution loss, of high-efficiency transformers to distribution companies and related government agencies, and encourage them to introduce only high-efficiency transformers.
		UNIDO, Economic Community of Central African States (ECCAS), Department of infrastructure and	Strengthen the capacity to trade and competitiveness of the private sector by supporting the quality infrastructure.	Regional quality policy elaborated; quality infrastructure established and reinforced; quality principles and practices promoted to private sector for their production	A regional quality policy was developed and awareness was raised to ensure its successful adoption. The quality Infrastructure institutions were strengthened through the creation of a coordination mechanism for standardization and quality promotion at the regional level (CEMAC-NORM). Technical capacities on certification related to food security was enhanced with more than 1000 people trained and more than 20 companies supported. 14 labs were supported on accreditation, including training and equipment. Quality was promoted through the creation of a Regional Quality Award.

		sustainable development of Central African Economic and Monetary Community (CEMAC)			
		UNIDO, West African Accreditation System (SOAC), Standards and Trade Development Facility (STDF)	To increase the resilience in the verification of accuracy of SPS related conformity assessment services (testing, inspection and certification) through digitalization and remote accreditation services in West Africa.	Increased resilience of SPS related conformity assessment services.	This project was preparatory and a full project proposal was developed and submitted to STDF Working Group for funding consideration. The STDF Working Group assessed that a further feasibility study would need to be conducted prior to project resubmission. The study is ongoing with SOAC and expected to be finalized by September 2022.
		UNIDO, Industry Ministry of SADC countries, SADC-Regional Laboratory Association (SRLA), National Laboratory Association (NLAs) of SADC countries	Support the increase of the capacity to verify standards compliance and quality requirements. 1)Strengthen SRLA to provide strategic support to NLAs; 2) Support NLAs to offer sustainable services; 3) strengthfood and water testing lab capacity	Strengthened laboratories in SADC region to provide high quality and reliable testing services for enterprises and regulators to facilitate trade.	The Regional Laboratory Association (SRLA) was strengthened with their capacity to support the national laboratory associations in providing efficient services to public and private sector laboratories. The capacity strengthening of SRLA included technical assistance to their support services to the labs to comply with standards and quality requirements in the agro-food processing area within the SADC region. Lab associations received strategic advice for their sustainability and were trained on validation methods and measurement of uncertainty to improve the confidence of the test results. For more information: https://open.unido.org/projects/M2/projects/150114
		UNIDO,	Objectives are to 1)	Competitiveness of West	1. Regional standards developed for 4 regional value chains (cassava

		<p>ECOWAS Commission, UEMOA Commission, Government Ministries of the 16 countries of coverage, Regional and national bodies for standardization, quality assurance, accreditation, quality assurance, accreditation and metrology (SQAM), Trade and Investment Promotion Offices (TIPOs), Business Support Organizations (BSOs), MSMEs</p>	<p>improve the performance, growth and contribution to industry, regional trade and exports of selected value chains; 2) improve the climate for business at national and regional levels</p>	<p>Africa strengthened and countries' integration into the regional and international trading system enhanced.</p>	<p>& derivatives, mango, textile&garments, ICT cross-cutting); 2) Laboratories supported towards accreditation (59 preselected laboratories, assessed by 13 national, regional and international experts; 3) The ECOWAS Certification Mark (ECOQMARK) being developed and pilot companies being supported to receive ECOQMARK; 4) A regional B2B networking event conducted in 2021 to facilitate linkages between mango, cassava and ICT suppliers and buyers; 5) "Start and Improve Your Business" (SIYB) training sessions delivered to 471 West African entrepreneurs. Certification of 32 West African trainers. An e-Academy established to support the trained trainers. For more information: https://open.unido.org/projects/M2/projects/170095</p>
		<p>UNIDO, Ministry of Industry or industry responsible agency for</p>	<p>Assess and identify gaps in the provision of Conformity Assessment services for traded products with the ultimate</p>	<p>Improved availability of market driven quality infrastructure services (testing and inspection) to support Trade Facilitation</p>	<p>A Quality Infrastructure for Trade Facilitation (QI4TF) e-tool was developed to help countries to systematically identify technical gaps to improve Quality Infrastructure systems. The tool was piloted in Malawi, South Africa and Tanzania providing a clear direction to both public and private sectors on where to focus their efforts to meet high value market requirements. The tool is currently available</p>

		inspection and testing of exports/imports, National Committee on Trade Facilitation Inspection Bodies	objective to bring down rejections, cost of double conformity assessment and disputes and delays at custom clearance		to be applied in other members. For more information: https://open.unido.org/projects/M2/projects/160184
d) Expand access to affordable renewable energy	Japan	Support for off grid energy / Support for renewable energy, including geothermal power generation	Access to energy in Africa will be increased.	-Ministry of Economy, Trade and Industry have held a series of workshops on geothermal power generation. Around 20 people from Ethiopia joined an online workshop in FY2021. In addition, METI plans to organise an online workshop with Kenya in Summer 2022. -JICA has been supporting projects of geothermal power generation in 4 countries. -JICA has conducted technical assistance and preparatory survey on renewable energy in 7 countries.	
	Japan	The Joint Crediting Mechanism	The Joint Crediting Mechanism will contribute to GHG emission reductions or removals by introducing leading decarbonizing technologies and infrastructure, etc. in its partner countries.		
	Japan	Capacity building for development of hydrogen supply chain (New Energy Human Resource Development Project)	Development of hydrogen supply chain in Africa will be promoted.		
	Japan	Joint investments with African partners in renewable energy, transition and green	Development in energy transitions through co-creation with African companies will be		

			infrastructure	further promoted.	
		Japan	Promote utilization of renewable energy through trust funds of World Bank, IFC and MIGA	Technical assistance for advisory services and capacity building will be provided to African countries.	
		The World Bank Group and AUC	Support energy access, incl through renewable energy at request of countries and in line with the AUC Agenda 2063, incl Scaling Solar program. The WBG Energy Access Initiative will emphasize developing untapped renewable energy sources.	Support the achievement of universal access by 2030.	\$ 2.6 billion in FY22 (of which \$347 million of renewable energy including solar and including \$2 billion specifically dedicated to access to energy).
		United Nations OSAA	Advocacy to expand access to affordable renewable energy	African Member States and their partners are promoting affordable renewable technologies in Africa.	UN OSAA partnered with its Knowledge network experts in publishing a series of knowledge products on the state of technologies. The first issue discussed green hydrogen as a potentially viable option for Africa's energy sector transformation.
		UNDP	Support investment in affordable and renewable energy in response to requests from African countries, including energy sector de-linking, expansion of rural energy access	Renewable energy programs implemented	UNDP is Party to the UN system's support to the implementation of the Regional Strategy for the Horn of Africa that is spearheaded by the Special Envoy to the Horn of Africa. Against this backdrop, UNDP is currently undertaking an analysis of energy demand and supply issues in the Horn of Africa. The UNDP commissioned Analysis Study has reached an advanced stage with country reviews already undertaken for Djibouti, South Sudan, Eritrea, Somalia and Ethiopia. The next steps are to prepare a cross-cutting findings and synthesize report with proposed interventions in a cross-country format (to go along with the more detailed individual country proposed interventions already prepared). It is anticipated that this

					work will be completed by end of September 2022.
		WFP	1) Provision of clean and efficient household appliances for cooking. 2) Provision energy products or services, including solar power systems and solar-powered appliances	Expand access to sustainable energy services.	1) Over 444,000 people in Chad, Niger, Nigeria and Senegal got access to sustainable energy services for food consumption, production, and/or communication. Most of these beneficiaries received clean and efficient household appliances for cooking. 2) Access to energy products or services for productive uses benefited 30,000 people in Niger and Senegal, while solar power systems and solar powered appliances were piloted in Chad.
		Toshiba Corporation Toshiba Energy Systems & Solutions Corporation Toshiba Africa PTY LTD	Supply wellhead geothermal power system	It is a small scale geothermal power generation system with advantages of short installation time for early operation. It can be installed in limited space such as the drilled wells, and enables to provide efficient use of geothermal resource.	Under construction in Ethiopia.

		NEC CORPORATION	NEC HYBRID ALTERNATIVE ENERGY STORAGE COMBINED WITH INTELLIGENT CONTROLS can contribute expanding access to affordable renewable energy in off grid rural area in Africa.	NEC HYBRID ALTERNATIVE ENERGY STORAGE COMBINED WITH INTELLIGENT CONTROLS can reduce over 50% of CO2 emissions and operational expenses such as fuel cost and diesel haurage.	Our NEC XON HSS is registered to Sustainable Technology Promotion Platform (STePP) of United Nations Industrial Development Organization (UNIDO) Investment and Technology Promotion Office, Tokyo (ITPO Tokyo) NEC XON HSS® : Hybrid Storage Solution for Optimizing Renewable Energy http://www.unido.or.jp/en/technology_db/8602/ Co-creation with International Organizations: http://www.youtube.com/watch?v=CiR4BcB9p9Q NEC XON Contribution to Africa thhp://youtu.be/HMODdQ97pkk Other reference activity about TICAD by NEC: https://www.nec.com/en/global/sdgs/innovators/project/article05.html

		FUJIFILM Corporation	FUJIFILM and Doctor promote understanding of the usefulness of ultrasonic diagnosis and training of diagnostic doctors in Kenya	By passing on techniques of using ultrasound equipment to other physicians from trained diagnosticians, diagnostic techniques in Kenya will improve.	In the first phase, Plan to train 10 to 20 doctors is in progress.
		Burkina Faso	Construction project of the ENEP of Kaya-2018- 2022- 6 billion 200million FCFA	Improving the educational offer in the North Central Region	The project is experiencing delays in its implementation due to security concerns in the North Central region.
		WFP	School aged children in targeted areas receive a nutritious meal at school or/and take-home rations to increase school enrolment and attendance.	Food insecure households in targeted areas have safe access to adequate and nutritious food.	Improve targeted households' access to adequate and nutritious food.
	b) Support higher education and harness STI for SDGs.	Japan	Assistance to E-JUST and Jomo Kenyatta University of Agriculture and Technology	5,000 people will be highly skilled for STI (including AI).	-JICA supported training programs offered at E-JUST and PAUSTI (hosted at JKUAT) in the field of science, technology and innovation for more than 5,000 people from FY2019 to FY 2021.
		Japan	Provision of scholarship to African students at E-JUST with the support of Egypt and Japan	150 African Students will be received at E- JUST.	-157 students from African countries were accepted/will be accepted at E-JUST and were received/will be received a scholarship granted by Egypt and Japan.

		Japan	International joint research with African institutions and collaboration with international organizations for STI for SDGs	Social implementation of the outcomes of the R&D will be promoted.	<p>-A JICA-funded technical assistance mission was conducted to help the Rwanda Space Agency to draft a national space policy in FY2020 and to hold space IOT communication experiment for commercialization in FY 2021.</p> <p>-Japan supported operation of Rwanda's first satellite, RWASAT-1 in FY 2019-2022.</p> <p>-In SATREPS program, eight projects respectively with Malawi, Kenya, South Africa, Ethiopia and Zambia were adopted from 2019 to 2022.</p> <p>-Cabinet Office supports Kenya and South Africa in addressing SDGs issues with Japan's STI in collaboration with UN agencies.</p>
		Japan	Capacity building through development, operation and utilization of small satellites, including small satellites deployment from the Japanese Experiment Module "Kibo" of ISS and satellite data utilization to solve social issues	ICT talents will be developed.	<p>-The GoJ supports developing and/or deploying three African nano-satellites (CubeSats) of Rwanda, Egypt and Mauritius from Japanese Experiment Module "Kibo" of the ISS , since TICAD7.</p> <p>-The GoJ invited all African countries to "KiboCUBE Academy," aiming at capacity-building for CubeSats manufacturing in cooperation with the UN.</p>
		Japan	Capacity building programs such as postgraduate program (including African students) and sending graduate students to Africa through United Nations University	Global leaders for promoting SDGs will be fostered.	<p>-The United Nations University Institute for the Advanced Study of Sustainability (UNU-IAS) contributes to developing global human resources. UNU-IAS offers master's and doctoral degree programs, and the approximately one-third of students come from Africa. Also, UNU-IAS has sent 66 students (as of September 2020) to Africa and its outcome was announced in the side event of TICAD7. Under the COVID-19 pandemic, UNU-IAS designed online programs of international leadership. In FY2022, UNU-IAS has been offered the degree programs via online and has been providing the online training program as an alternative activity of sending students the same as last year.</p>

		The World Bank Group	The Human Capital Project is a global effort to accelerate more and better investments in people for greater equity and economic growth.	improved education systems for secondary and tertiary education, with a focus on improving learning outcomes, and addressing a lack of talent in Science, Technology, Engineering and Mathematics (STEM) field in Africa, which is critical for regional economic development and providing the students with the skills needed to access good and create good jobs.	WB approved a total of \$2 billions in IBRD/IDA projects for education in FY22, out of which \$96 millions for broader Human Capital development and ACE projects.
		The World Bank Group	Human capital is central to WBG's efforts to end extreme poverty by 2030 raise income of bottom 40% people. Human Capital Project is a global effort to accelerate better investments in people for greater equity and economic growth.	improved education systems for primary education, with a focus on improving learning outcomes, and addressing a lack of talent in Science, Technology, Engineering and Mathematics (STEM) field in Africa, which is critical for regional economic development and providing the students with the skills needed to access good and create good jobs.	In FY22 the WB approved \$1.3 billions in IBRD/IDA financing for Human Capital Development.

		The World Bank Group	Support for higher education and implementation of regional African Centers of Excellence in response to requests from African countries	Higher education programs under implementation	In FY22 WB approved \$470 millions in IBRD and IDA projects for improving the quality of higher education.
		United Nations University — Institute for the Advanced Study of Sustainability (UNU-IAS)	Postgraduate degrees (MSc & PhD) on sustainability, with a third of the students from Africa. The Global Leadership Training Programme (GLTP) trains postgraduate students to address development issues in Africa	UNU-IAS postdoctoral degrees produce the policymakers and researchers of tomorrow, who will advance global efforts towards a sustainable future. GLTP develops human capital for implementing the TICAD agenda and the SDGs in Africa, strengthening academic partnerships with African universities. A new course trains 20 students from Asia and Africa annually.	To date the programme has supported 66 Japanese postgraduate students in studies at 24 universities and research institutes in 13 African countries. The most recent field reports, from the 2019 students, are available at: https://ias.unu.edu/en/news/news/outcomes-of-2019-global-leadership-training-programme-in-africa-highlighted-in-workshop.html
		UNICEF	Provision of school infrastructure, including WASH facilities, supplies, teacher training, and awareness raising on the importance of education enabling learners to continue learning safely during COVID-19.	Prevention and mitigation of impacts of COVID-19 and overlapping emergencies on nutritional, water and sanitation, learning and health outcomes of vulnerable children.	Strengthened school systems to enable learners to continue learning safely during COVID-19.

c) Promote vocational training and increase access to services and expanded opportunities for women and youth	Japan	Capacity building through technical cooperation including Kaizen Initiatives, human resource training centers and contribution to AfDB trust fund (*3)	140,000 people, including women and youth, will be trained.	<ul style="list-style-type: none"> - METI and AOTS provided trainings to 299 people for Japanese-affiliated or local companies in FY2021. -AfDB Trust Fund provided business guidance to 196 SMEs, business advice to 4,085 people, and offered 23 people scholarship through Japan Africa Dream Scholarship Programme. -9 people participated in GLOPAC Fellowship Program, the training for financial regulators/supervisors by FSA, in FY2019-FY2021. -Over 304,000 people received trainings for industrial development supported by JICA in FY2019-FY2021; over 78,000 people received training through Kaizen Initiative; 40 students joined master's course and had internship KIZUNA Programme; CARD, SHEP, blue economy, and ABE initiative were conducted.
	Japan	Implementation of training and exchange programs for officials and others from countries that are making efforts to combat gender-based violence	Human resources to combat gender-based violence will be developed.	<ul style="list-style-type: none"> -Japan supported OSRSG-SVC to train 147 judicial police officers and professionals on investigation and prosecution of conflict-related sexual violence and provide workshop for 177 CSO and military personnel. Total of 226 women formerly associated with armed groups also accessed to reintegration services. -Through UN Women, Japan contributed to support and train 634 stakeholders involved in COVID-19 response of GBV in four countries. Total 651 people increased knowledge on GBV and 199 victims of sexual violence benefitted from referral service in two countries. -Japan implemented the Asia-Pacific and African Women's Exchange Program in FY2021 to contribute to the elimination of GBV.
	Japan	Exchange of youth and students	Mutual understanding between African youth and Japanese youth will be deepened.	<ul style="list-style-type: none"> -A total of 2,005 African students studied in Japan as of 2021 (209 students took online classes). - Two Japanese students studied in Africa as of 2020. - SAKURA Science Exchange Program invited a total of 23 people from South Africa, Benin, and Egypt in FY2021 (online). - JICA provided training programs for 203 young leaders in Africa and dispatched over 580 JOCVs between FY2019 and FY2021.

		Japan	UN Women /OSRSG-SVC Supplementary Budget Projects	Women will increase access to services, such as livelihood support, justice, health care and COVID-19 related services.	
		Japan	UN Women Supplementary Budget Projects	Women and youth will improve vocational skills.	
		Japan	Provide education opportunity through World Bank trust funds	Scholarship for students in African countries will be provided.	
		African Union, African Union Commission, African countries, other partners...	The African Migration Observatory, a specialized technical agency of the African Union Commission to build strong and credible data on migratory flows in Africa.	The aim of the African Migration Observatory is to create credible data on migratory flows that would provide for sound policies on migration in the continent. It would allow for African countries to build on a positive narrative on migration, focused on integration and development, to better the lives of migrants on the continent, and create synergies and complementarity between African countries in this regard.	The African Migration Observatory has been inaugurated. It has an interim Director and an interim staff with headquarters in Rabat, Morocco.

		AU-AUC	Exchange of statisticians from Statistics Bureau of Japan and National Statistical offices from African Union Member States	Experiences and good practices on statistical quality system shared	Initiative for Food and Nutrition Security in Africa (IFNA) and other measures to contribute to improving nutritional status in IFNA countries with the aim to support 200 million children under five / Hosting of Tokyo Nutrition Summit 2021/ Holding IFNA Partners Meeting together with AUDA-NEPAD and RECs. Nutritional status of IFNA African countries will be improved through existing national multi-sectoral/stakeholder approach and IFNA nutrient-focused approach.
		AU-AUC	Exchange of statisticians from Statistics Bureau of Japan and National Statistical offices from African Union Member States	Experiences and good practices on statistical quality system shared	Not implemented due to financial constraints
		AU-African Capacity Building Foundation	Promote enrollment of women in STI education by encouraging regional STI education for female students	Improved gender equality	Not implemented due to financial constraints
		The World Bank Group/AU-AUC	Technical assistance and capacity development of statisticians of National Statistical Offices in Africa and support the development of technical trainings for the implementation of the Strategy of the Harmonization of Statistics in Africa (SHaSA2)	Vocational program training under implementation and guidelines developed to strengthen the capacity of statistician for production of harmonized and quality data	In FY22 the WB approved \$371 millions in IBRD/IDA financing to improve Statistical Capacity.

		The World Bank Group	The Human Capital Project is a global effort to accelerate more and better investments in people for greater equity and economic growth.	Technical and vocational education and training — which can last anywhere from six months to three years— can give young people, especially women, the skills to compete for better paying jobs.	In FY22 WB approved \$490 millions for IBRD and IDA projects for vocational training and skill development for employment.
		UNDP	Improved vocational, technical, and life skills and capacity	Inclusive and gender sensitive TVET programmes in place	Following completion of the TVET review, the report was disseminated and recommendations implemented in the UNDP regional youth programme. The programme reinforced its support for youth economic empowerment through the entrepreneurship initiative with Tony Elumelu Foundation in Mali and across the Sahel region and within the YouthConnekt project activities such as the regional youth bootcamps and innovation challenges. Due to changes within the programme orientation (as captured within UNDP's Renewed Strategic Offer for Africa, and Governance and Peacebuilding Framework), the TVET related focus was suspended and shifted towards supporting youth inclusion in AfCFTA.
		UNDP	Youth Engagement and Empowerment (YEEP)	Youth empowered with skills and through the improvement of entrepreneurial ecosystem to obtain enhanced access to economic opportunities and actively contribute to their communities	Through UNDP RBAS' new Regional Youth Project (no longer referred to as YEEP), support to youth is provided through both its youth leadership programme activities and through its support to youth entrepreneurs and change makers through improvement of entrepreneurial ecosystem to obtain enhanced access to economic opportunities and actively contribute to their communities. Work includes both incubation and skills building as well as policy review and dialogue. Morocco, Tunisia and Egypt will be involved in the "Green Growth and Job Acceleration" project starting in Q3 2022.

		UNITAR	Online training modules on needs assessment, design strategic framework in various STEM areas partnering with local, international institutions (e.g., CERN, UNESCO, Harvard Medical School, Global Engineering Deas Council, others)	<ul style="list-style-type: none"> • Challenges and opportunities for youth and women in project regions assessed. • Possible solutions tailored to local context formulated. • Partnerships and networks for sustained action. • Deeper understanding of values and rights in the public sector, role of ethics and integrity. • Multi- sector approach to create opportunities for participants to collaborate and peer-learn. 	Some of the key results are highlighted below: <ul style="list-style-type: none"> • Increased ability to plan and lead concrete initiatives and projects using STI at the core. • Successful presentation of viable projects to be implemented in local and regional backdrop by participants. • Stronger networks of young and mid- career professionals across various backgrounds from similar regions to help harness a strong community of change agents. • Strong gender inclusion across programs helped to empower and enable women with STI resources and methodologies. Data analysis for project cycle 2020- 2021 are in process of completion, so only 2019-2020 reports can be accessed below: https://unitaremail.sharepoint.com/:b:/s/ho/ESoDtcBSni5lJetoLsysAcYBs2NXzGteU9DjrEHSCcHQhA?e=teXTiV https://unitaremail.sharepoint.com/:b:/s/ho/EXd0y0XJVONKhcR8wR5NYyoBHPCUTxC-9gnd1Q_KoIE2A?e=VccAUd
		UNITAR	Launched a pilot training on Digital Health and Social Entrepreneurship for women and youth in Sahelian countries, namely; Burkina Faso, Cameroon, Chad, Guinea, Mali, Mauritania, Niger, and Senegal	Programme completed in March 2022 with participants achieving key skills in integrating digital health with digital entrepreneurship, along with designing and developing solutions tailored to the local context, including collaborations with peers.	The pilot programme was in joint partnership with The University of Columbia, USA. The programme lessons were well received with two weeks of online learning and weekly live webinars. The participants highlighted the need for similar programmes which can be longer and have more intent. There was an interest in the programme focus areas of digital health and social entrepreneurship. More programmes with similar themes are being considered for the region.
		UNIDO, relevant ministries and vocational training centers in the beneficiary countries	Support for human capital development through quality technical and vocational training for effective management of natural resources critical to global value	Skilled and capable workforce in gainful employment to support the sustainable management of natural resources.	The project is ongoing. The project inception reports are complete for 3 countries (South Africa, Mozambique and Zambia) and defined a total of 7 projects and 3 national Public Private Development Partnerships (PPDPs).

		(South Africa, Mozambique, Zambia)	chains, covering the forestry sector and water resource management.		
		UNIDO, FAO, Ministries responsible for forestry and technical vocational education, SADC Forestry Secretariat, Forestry education institutions, Forestry and forest industry associations, federations, companies and SMEs	Support to improve regional collaboration through Public Private Development Partnerships (PPDP) on forestry and wood industry education and training for green employment creation and sustainable forest management and utilization.	Capacity building programme to strengthen forestry education institutions in the SADC region with a special emphasis of wood industry labour needs developed and supported by SADC countries, by donors and the private sector.	SADCIII secured PPDPs with two training institutions and delivered trainings to: 15 trainers and 214 learners (36% women). The project also supplied assets and skills training to 12 SMEs (50% female owned). For more information: https://open.unido.org/projects/M2/projects/130067
2.2 Accelerate UHC in Africa and improve nutrition Corresponding AU flagship initiatives:	a) Expand UHC in African Union Member States through improved primary health care and resilient health	Japan	Improvement of access to primary health care and hygiene / Ensure affordable health service including through expansion of health insurance	3,000,000 people will benefit.	- JICA conducted demonstration utilizing telemedicine applications in Kenya and DRC in FY2021. - JICA conducted a wide range of health care projects, and over 1.9 million people benefited in total between FY2019 and FY2021.

<ul style="list-style-type: none"> - Implementation of the Health Strategy; - Operationalization of the Continental Policy Framework for Sexual and Reproductive Health and Rights (2016-2030) - Africa Regional Nutrition Strategy 2015-2025 - CAADP - African CDC; - AU Strategy for Gender Equality & Women's Empowerment 2018-2028 	<p>systems, engage private sector, PPP's and use technology</p>	Japan	Enhance health workforce through training of health personnel	26,000 people will be trained.	<ul style="list-style-type: none"> - 727 health workers were trained in the projects for global extension of medical technologies conducted by National Center for Global Health and Medicine (NCGM) and MHLW from FY2019 to FY2021. - 41,224 health workers participated in training programs offered by JICA between FY 2019 and FY 2021.
		Japan	Africa Health and Wellbeing Initiative including through engagement of private sector	Under Africa Health and Wellbeing Initiative, MOC will be implemented in the initially selected 6 countries to deepen cooperation and promote healthcare businesses, including through engagement of private sector.	<ul style="list-style-type: none"> -Memorandums of Cooperation on healthcare were signed with six countries (Ghana, Kenya, Senegal, Tanzania, Uganda and Zambia) . In 2020, Public-Private joint mission visited Kenya, Uganda and Ghana to discuss healthcare issues with the people concerned including Ministry of Health, and conducted a healthcare business seminar in Kenya. In 2021 and 2022, online seminars were held with MOC countries and Tunisia to introduce Japanese products and services with a view to solve healthcare issues and to achieving UHC. -Total of 16 Health projects were adopted for JICA and government's PPP program since 2019.
		Japan	Support for prevention and treatment of AIDS, TB and Malaria	500,000 patients with AIDS, TB and Malaria will be saved.	-Between FY2019 and FY2022, Japan contributed about 92 billion yen to the Global Fund, 7.42 billion yen to GHIT, about 1.29 billion yen to Unitaid.
		Japan	Expansion of vaccination coverage including polio vaccine	800,000 children will be vaccinated.	-Between FY2019 and FY2022, Japan contributed about 117 billion yen to Gavi and 18.7 billion yen to CEPI.
		Japan	R&D to combat Neglected Tropical Diseases (NTD)	Measures to prevent and treat neglected tropical diseases will be developed.	-Between FY2019 and FY2022, Japan contributed 7.42 billion yen to GHIT.
		Japan	Preparedness and response for public health threats and emergency	Provide financial and technical assistance including financial contribution to CFE and PEF.	-Japan supported preparedness and response for public health threats and emergency through contribution to WHO, Unitaid, Gavi, CEPI and Global Fund. In response to the Covid-19 pandemic, Japan has committed up to 1.5 billion USD for the COVAX Facility. In addition, Japan has donated approx. 44M doses of Covid-19

					vaccines including through the COVAX Facility. -Japan has contributed to HEPRTF (successor to PEF) in total USD 150 million by July 2021. In addition, Japan has also committed to contribute additional USD 30 million to promote project formulation in African countries.
		Japan	Fighting against zoonosis in cooperation with OIE (Japan · OIE Cooperation Program)	Research capacities in zoonosis will be improved and surveillance and response measures against infectious diseases through community management will be enhanced.	-Regular meetings have been held continuously between JICA and OIE Regional representation for Asia and Pacific. “Project for the epidemiological research on zoonotic virus infection in Africa” is implemented in DRC and Zambia, and project “PREPARE for Emerging and Reemerging Infectious Diseases in Southern Africa Region” (Third country training) was conducted in close collaboration with OIE, inviting OIE as an instructor for a workshop.
		Japan	Support for VSV-HIV Vaccine Development	VSV-HIV vaccine development will be advanced.	
		Japan	Cooperation based on Global Health Strategy	To contribute to developing resilient Global Health Architecture and strengthening PPR, and to achieve more resilient, equitable and sustainable UHC.	-Utilize various schemes (grant aid, ODA loan, technical cooperation etc.) and encourage private investments to deliver effective outcomes to support African countries' efforts.
		AUC	Improvement of access to primary health care and hygiene/Ensure affordable health service including through expansion of health insurance.	Progress towards Universal Health Access enhanced	Consultation held with member states on Universal Health Coverage, Questionnaires have been sent to member states to assess the progress made at national and regional levels to achieving Universal Health Coverage. To date 15 member states have responded to the questionnaire.
		AU-AUC	Enhance Health workforce through implementation of the 2million Community	2,000,000 people with be trained in Africa	The Commission undertook a mapping survey on the Community Health workers on the Continent. Findings highlight the need for governance structures and training among others. (2017 decision of the African Heads of State)

			healthworkers Initiative		
		AU-AUC	Support for prevention and treatment of AIDS, TB and Malaria through high- level Advocacy	Reduction in the new cases of AIDS, TB and Malaria (especially in children)	-With the Covid 19 pandemic, there has been an increase in the number of new cases in the three diseases. Peadiatric HIV/AIDS and TB have also been neglected in recent diagnosis and treatment tools.
		AU-AUC	High-level Advocacy to raise awareness, R&D to combat Neglected Tropical Diseases (NTD)	number of countries reporting elimination of at least one NTD increased from baseline of 5(Five) in 2022	The African Continent has seen an increase in the number of Member States that have eliminated atleast one NTDs since 2018. The Agenda 2063 call for the elimination of NTDs by 2030
		AU-AUC	Support the operationalisation for the Africa Medicines Agency	Harmonised regulatory mechanisms and promotion of local vaccines and medical products manufacturing in Africa	The Commission in collaboration with AUDA-NEPAD have undertaken various initiatives to support local manufacturing and harmonisation on the Continent.
		The World Bank Group	Support for health systems, involvement of private sector and use of technology for health in response to requests from African countries	Health systems strengthening programs under implementation	In FY22 the WB approved \$1.5 billions in IBRD/IDA financing for improving basic health services and health system strengthening.
		United Nations OSAA	Advocacy for UHC in Africa	Commitments made by African countries and partners on UHC	In 2021, UN-OSAA advocated for UHC in Africa through the preparation of the UN Secretary-General Report on Progress in the Implementation of NEPAD. The report was considered by the UN General Assembly on 28 July 2021.

		United Nations OSAA	Advocacy for UHC in Africa	Commitments made by African countries and partners on UHC	In May 2020, UN-OSAA, in close collaboration with UNECA, UNDP and other UN entities prepared the Secretary-General Policy Brief on the Impact of COVID- 19 on Africa. The policy brief advocated for strengthening healthcare systems and UHC in Africa, as part of the global advocacy of the UN Secretary-General on the fight against COVID-19.
		UNFPA	Achieving the three transformative and people- centred results to ensure healthy lives and universal access to sexual and reproductive healthcare service in Africa	UNFPA aims to achieve three transformative and people- centred results in the period leading up to 2030. These are: (a) ending preventable maternal deaths; (b) ending the unmet need for family planning; and (c) ending gender-based violence and all harmful practices, including female genital mutilation and child, early and forced marriage.	In 2021,with approximately 5.7 million USD from Japan’s supplementary budget, UNFPA implemented sexual and reproductive health projects in seven African countries. Following the TICAD7 official side event hosted by UNFPA and the OAFILAD, Japan’s exchange programme, to facilitate experience sharing and networking among GBV response practitioners in Asia-Pacific and African countries, conducted online meetings and a public seminar, where the Director of UNFPA Japan Office delivered a lecture. This is expected to lead to cooperation initiatives for the eradication of GBV beyond borders between countries and regions, such as TICAD8, which is planned for 2022.
		Eisai Co., Ltd.	Efforts to combat NTDs in African countries including drug donation, disease awareness and infrastructure development, in partnership with WHO, local governments, NGOs and companies.	Accelerate achieving SDGs and WHO NTDs roadmap 2030, which alleviate social & economic burden in NTDs endemic countries, with improving government ownership, enhancing awareness of NTDs, establishing infrastructures and building capacities in local.	As of June 2021, Eisai has provided 2.02 billion DEC tablets to 28 countries, including 398.9 million for Africa contributed to more than 159 million people in Africa as planned. COVID-19 material support contributed to the COVID-19 measures in Africa and resumption of MDA in Kenya, 4 water tanks were successfully installed in 4 villages and construction of PCR testing laboratories is ongoing. Activities for mycetoma including disease awareness, patient survey and treatments for mycetoma patients were successfully conducted in Sennar state in Sudan and will be expanded to another state. https://www.eisai.com/sustainability/atm/lymphaticfilariasis.html https://www.eisai.com/sustainability/atm/medicines/020.html https://www.eisai.com/news/2021/news202110.html https://www.eisai.com/news/2019/news201912.html https://www.aarjapan.gr.jp/activity/report/2021/0414_3179.html https://www.eisai.com/ir/library/annual/pdf/epdf2020ir.pdf (page

					65-68)
		<p>IPPF Member Association in Burundi (Association Burundaise pour le Bien Etre Familial - ABUBEF) supported by IPPF Japan Trust Fund</p>	<p>In a country heavily affected by natural disasters and conflict, ABUBEF provided coordinated humanitarian health assistance to the vulnerable displaced persons and the host communities hit by natural disasters.</p>	<p>A strong platform of humanitarian health services coordination established; Non-discriminatory, inclusive health services provided; Knowledge of sexual and reproductive health and rights, health-seeking behaviour, and life skills improved among internally displaced persons, refugees, returnees, and the host community</p>	<p>A humanitarian coordination platform was established with 14 organizations to improve people's access to SRH services. The platform became a strong collective voice which informed the work of the Mother and Child Health Thematic Group on the continuity of services during COVID-19 pandemic. ABUBEF centres in Rumonge and Muyinga were equipped for service provision in a humanitarian situation. The project provided 15,585 family planning services, 1,341 HIV-related services, and 5,563 other SRH services. A total of 14,941 community members including people living with HIV were reached with sessions to improve SRHR knowledge, health-seeking behaviour, and life skills.</p>
		<p>IPPF, IPPF Member Association in Uganda (Reproductive Health Uganda-RHU), Saraya Co. Ltd, JOICFP and Ministry of Health in Uganda</p>	<p>Through PPP, a five-party partnership including Saraya Corporation, the project contributed to the national goal of ensuring all people in Uganda have access to quality health care services by 2020.</p>	<p>Through working with a mix of health care facilities on the strengthening of quality of care in SRH service delivery, the project aimed to improve clients' perception of health services, client safety, health workers' occupational health and safety, and health facilities' capacities and compliance with the health sector</p>	<p>RHU formed partnerships with public hospitals and private clinics. Some district leadership took ownership to the cause of the project and raised funds for health facility improvement. The links established between RHU clinics and the local facilities, public and private, became a network of supply chain and implementation of quality of care principles and practices following training on integrated SRH service provision and hygiene. The hygiene training and locally produced hand sanitisers provided by Saraya subsidiary prepared the health facilities to follow the government's COVID-19 infection prevention guidelines. Through the project, RHU alone reached 124,439 clients with 183,690 SRH services.</p>

		<p>IPPF Member Association in Mauritania (Association Mauritanienne pour la Promotion de la Famille - AMPF) supported by IPPF Japan Trust Fund</p>	<p>AMPF works in and around the M'Berra camp close to the Malian border to improve the sexual and reproductive health (SRH) outcomes of the Malian refugees and the host communities.</p>	<p>High-quality health services are provided to 27,120 people; Additional 15,775 people have access to information on sexual and reproductive health and rights (SRHR); Political and financial commitment of 5 decision-makers and 7 elected officials of the commune of Bassiknou to SRH is strengthened.</p>	<p>AMPF takes IPPF's client-centred approach in providing integrated SRH services to the refugees and the host communities. The target population includes people living with HIV, people with disabilities, and survivors of SGBV, and the service provision ensures confidentiality, inclusivity, and no discrimination through service provider training. Outreach activities enable improved access by vulnerable people, and to achieve a bigger reach, community health workers were trained to provide counselling and testing for HIV for the first time. As at March 2021, AMPF provided 24,002 SRH services to 13,780 people and reached additional 8,290 people with SRH information.</p>
		<p>IPPF Member Association in Togo (Association Togolaise pour le Bien Etre Familial - ATBEF)</p>	<p>Following compelling results of a previous project which introduced a low-cost cervical cancer prevention programme to Togo, ATBEF rolls out the programme more widely in the country with innovative approaches.</p>	<p>15,000 women are provided screening and prevention services; 15 health service providers can screen and treat precancerous lesions in the cervix; 15,000 women are provided screening and prevention services;a sustainable model of cervical cancer prevention programme created through advocacy and community participation.</p>	<p>ATBEF, named the national leader on cervical cancer by the health ministry, continues to work closely with them on this project. ATBEF equipped all of its clinics, trained their staff, and started service provision—also through outreach campaigns—to scale up nationally. Through the project and by June 2021, ATBEF screened 10,818 women and managed 198 pre-cancerous lesions; Under the ATBEF leadership and in coordination with the relevant health ministry offices, an advocacy platform has been formed with its partner organisations. A community level financial mechanism is being developed to enable women access the preventive treatment at a subsidised rate.</p>

		<p>IPPF Member Associations in 43 African countries, namely Algeria, Benin, Botswana, Burkina Faso, Burundi, Cameroon, Cape Verde, Central African Republic, Chad, Comoros, Congo, Congo (DR), Cote d'Ivoire, Djibouti, Egypt, Eswatini, Ethiopia, Ghana, Guinea-Bissau, Guinea-Conakry, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritius, Morocco, Mozambique, Namibia, Niger, Nigeria, Sao Tome & Principe, Seychelles,</p>	<p>Provide sexual and reproductive health services, including maternal and child health and sexual and gender- based violence response, to people, particularly vulnerable groups, such as women, girls, people in humanitarian crisis.</p>	<p>Making pregnancy and childbirth safe, reducing unwanted pregnancies and unsafe abortions, reducing HIV transmission and supporting people living with HIV, thereby saving lives of people (especially women), saving health care costs and reducing the number of years of healthy life lost due to disease, disability and premature death (DALYs).</p>	<p>In 2019 and 2020, IPPF Member Associations in 43 African countries contributed to UHC by collectively delivering 267,910,619 services, which includes 35,215,767 gynaecological, 21,923,959 obstetric, 8,448,077 paediatric, 54,236,890 HIV related and 2,544,602 infertility-related services. 44 % of the total services were for young people (<25) in Africa. IPPF Member Associations also reached 81,467,508 persons in total, 71,085,995 of whom were women and 6,403,714 were people in humanitarian settings in Africa. By doing so, IPPF Member Associations averted 13,531,148 unwanted pregnancies and 4,008,386 unsafe abortions, saved 42,611 women's lives, US\$ 794,382,953 equivalent of direct health cost and 25,163,063 DALYs in Africa.</p>

		WFP	Patients of such as HIV, TB, ART receive fortified and/or specialized nutritious food and social and behaviour change communication to prevent and treat acute malnutrition.	Patients of such as HIV, TB, ART will have access to nutritious food, and treat and prevent acute malnutrition.	Chronically food and nutrition insecure populations receive adequate assistance and services to prevent malnutrition.
		UNIDO, West African Health Organization (WAHO)	To develop a programme for the implementation of the Good Manufacturing Practices (GMP) roadmap framework and associated national-level initiatives across the ECOWAS region. The	Initial components of the long-term comprehensive programme to support the pharmaceutical manufacturing industry in the region launched under WAHO leadership.	For more information: https://open.unido.org/projects/M2/projects/190104

			development of the pharmaceutical industry more broadly.		
		UNIDO, WHO, Ministries of Health and Ministries of Industry in five target countries	Support to improve supply of quality-assured, locally manufactured PPE (personal protective equipment), hand sanitiser and disinfectants and to improve the response capacity of national healthcare systems on the continent.	Increased ability for African countries to meet their needs for PPE, sanitiser and disinfectant supply; - Improved ability to protect healthcare, industrial and other workers through local sourcing of quality-assured products; - Strengthened manufacturing industry will improve employment prospects, reducing the direct economic impact of the COVID-19 crisis on individuals, countries and the continent as a whole.	For more details: https://open.unido.org/projects/M2/projects/200144
		FUJIFILM Corporation	Training of ultrasound doctors and diagnosis of tuberculosis in areas where medical access is difficult.	Strengthening the regional medical system	Currently running a project
		UNICEF	Provision of immunization and maternal and child health support (eg. GOJ's last one mile initiative)	Increased cold chain capacity, to ensure continuous availability of vaccines in all regions of the country in particular at sub-national level and	Strengthened routine immunization services and health systems to support child and maternal health in the context of achieving UHC.

				reduction of wastage and increased distribution.	
b) Enhance sustainable health financing, including through domestic resource mobilization and PPP's	Japan	Promote UHC in line with G20 Shared Understanding on the Importance of UHC Financing in Developing Countries	Health system for UHC is strengthened by promoting sustainable health financing.	-To support African countries' effort to strengthen health systems towards UHC, technical assistance is provided in 14 countries through Japan's trust fund in World Bank between 2019 and 2022. -JICA promoted formulation of health financing projects such as creation of social insurance and assistance on insurance management. -Loan agreement was signed with the Government of Kenya to provide a Japanese ODA loan of up to 8 billion yen for the Health Sector Policy Loan for the Attainment of the UHC (Phase 2). -UHC 2030, the global platform for promoting UHC in which Japan provides financial support, co-hosted a side event on sustainable global investment for health at FfD Forum in April 2021.	
	Japan	Reducing the healthcare supply gaps created by COVID-19 through IFC's Global Health Platform	Supports for strengthening the production and supply chain capacity of vaccines and medical supplies will be provided.		
	AU African Risk Capacity	Support to advance Outbreaks and Epidemics parametric sovereign insurance	Financial preparedness plans for Outbreaks & Epidemics are developed in timeline of three years.	The introduction of ARC O&E product is at advanced stages, with work on the two pilot countries (Uganda and Guinea) that drew on the conclusions of the risk assessment phase conducted between 2018 – 2020 completed. Legal review and work on disease modelling and market consultations also finalized including development of the O&E Preparedness Index and Disease Model. A few donor commitments have already been received.	
	AU - AUDA-NEPAD	Implementation of the Africa Leadership Meeting on Investing in Health	Increased mobilised domestic resources for health;	The Piloting of Health Financing Tracker in 15 AU Member States; The ongoing establishment of Pilot Regional Health Financing Hubs in two RECs (SADC and EAC); the development of Private Sector Engagement Health Strategic Framework	

		The World Bank Group	help countries expand access to quality affordable health care. It prioritizes protecting people from falling into poverty due to illness; and promoting investments in sectors that form the foundation of healthy societies	With universal health coverage (UHC), developing countries to provide quality, affordable health care to everyone, regardless of their ability to pay, reducing financial risks associated with ill health, and increasing equity	In FY22 the WB approved \$4 billions IBRD/IDA financing for health projects for COVID-19 Emergency Preparedness and Response.
		The World Bank Group	Support for health financing, including through domestic resources, in response to requests from African countries	Health financing programs under implementation	implementation of the various program is ongoing. WB'S intervention is multiyear and long term scope. More concrete progress can be reported in following year.
		WFP	Nutritionally vulnerable populations benefit from improved access to nutrition and health services through capacity development and strengthening of health and nutrition delivery system.	Vulnerable population at risk of malnutrition, especially young children, pregnant and lactating women, and elderly can meet their basic nutrition requirements all year round.	Capacity of health and nutrition delivery system to be improved and developed. Vulnerable populations benefit from improved access.
		RAME (Réseau d'Accès aux Médicaments Essentiels)	Support for creation of universal health insurance and Health System strengthening.	Access to better health by the population will be increased. Support for creation of Universal health insurance and Health System strengthening in several countries in Africa.	Recommendations to the government and other stakeholders have been shared on health systems strengthening and results are being followed-up. maintaining.

c) Implement programs to reduce childhood stunting and all forms of malnutrition	Japan	Initiative for Food and Nutrition Security in Africa (IFNA) and other measures to contribute to improving nutritious status of 200,000,000 African children under five / Hosting of Tokyo Nutrition Summit 2020	Nutrition of African children will be improved.	<p>- Japan has held seminars and discussions on improvement of nutritional status of African children to prepare for Tokyo Nutrition for Growth Summit 2021. MAFF, JIRCAS (Japan International Research Center for Agricultural Sciences) and NJPPP organized the official side-events in collaboration with international organisations.</p> <p>'- Japan promotes research and development projects contributing to nutrition improvement in Africa in collaboration with international and national institutes.</p> <p>'- JICA provided 69 people training courses on nutrition, and started technical cooperation projects to improve nutritional status in eight countries in FY2019-FY2021.</p> <p>-JICA arranged several high-level events at TICAD, SUN and GNR.</p>
	AU - AUDA-NEPAD	Support to the expansion of nutrition programmes in all African countries together with IFNA Secretariat RECs. AUDA- NEPAD Nutrition and Food Systems Implementation Plan 2019-2025	Nutrition issues are mainstreamed and prioritized among development agenda through in Africa.	<p>Provide technical and financial support to AU Member States to accelerate the implementation of Malabo- Nutrition Declaration , SDGs and Agenda 2063 by prioritizing Food and Nutrition Security -FNS investments and Security Capacity development of African Members States; Advance Home Grown School Feeding Programme in Africa to address hunger and malnutrition and Accelerated the implementation of FNS agenda in Africa with the following outcomes:</p> <p>1)Advocated for FNS investments through global and continental forums such as the UNFS Summit, AU Summit, Tokyo N4G Summit. 2)Capacity building delivered in Africa through existing training tools, including IFNA approach.</p>
	The World Bank Group	Support for nutrition measures in response to requests from African countries and AUC	Nutrition programs under implementation	In FY22 the WB approved a total of \$4.2 billions in IBRD/IDA financing for Health, Nutrition and Population projects out of which \$235 millions specifically to improve nutrition services and outcomes.
	WFP	Moderately acute malnourished children aged 6 months - 5 years and pregnant and lactating women	Vulnerable population at risk of malnutrition, especially young children, pregnant and lactating women, and	Improved nutritional status of moderately acute malnourished children and pregnant and lactating women by refeeding specialized nutritious foods and nutrition counselling. Mothers and families equip knowledge about nutrition to sustain their nutritional status.

			receive specialized nutritious foods and nutrition counselling to improve their nutritiona	elderly are able to meet their basic nutrition requirements all year round.	
		WFP	1) Provide specialized nutritious foods to shock- affected population in emergency context. 2) Promote production and consumption of nutritious foods. 3) Provide social and behaviour change communication to enhance good nutrition	Ensure access to safe, nutritious and sufficient food at all times and achieve improved nutrition through consumption of nutritionally adequate diets with complementary actions to support utilization	1) 1.5 million people (60 percent women) assisted with malnutrition prevention programmes in 15 countries (Benin, Burkina Faso, Cameroon, Central African Republic, Chad, Ghana, Guinea, Guinea-Bissau, Mali, Mauritania, Niger, Nigeria, Senegal, Sierra Leone, Togo) and 1.4 million people (63 percent women) received malnutrition treatment in 13 countries. A total of 54,000mt of specialized nutritious foods were provided. 2) assistance ongoing for smallholder farmers and food processing units at local and national levels to produce high quality nutritious foods (Burkina Faso, Mali, Niger). Capacity of two local industrial food processors built to ensure availability of Specialized Nutrition Products (Ghana). Support ongoing for the implementation of the national rice fortification strategies (Cameroon, Côte d'Ivoire, Nigeria, Senegal and The Gambia). 3) Social and behaviour change communication was provided in all the 19 RBD countries.
		UNICEF	Screening/treating children and treating severe acute malnutrition. Prevention of malnutrition through promotion of infant and young child feeding, and provision of micronutrients to women and children.	Early detection and timely treatment of children suffering from acute malnutrition. Strengthened network of community nutrition responders who can ensure quick referrals of malnourished children to health facilities. Women and children have access to nutritious diets, health care and supplies.	Strengthened network of community responders to identify and treat children with severe acute malnutrition. Enhanced understanding of infant and young child feeding and provision of micronutrients to women and children.

		FAO	Enhance nutrition-sensitive agrifood systems	Nutrition-sensitive agrifood systems are enhanced	FAO provided policy papers and knowledge products on healthy and locally available nutritious food options to AUC/ AUDA-NEPAD officials to strengthen agrifood systems transformation for better nutrition and livelihoods through advocacy and educational activities; at the country level, FAO continued to promote nutrition tools by delivering Food Based Dietary Guidelines and consumer awareness products on healthy diets to governments and national stakeholders; published and disseminated a report on Home Grown School Feeding programmes and a compendium of successful case studies to support them in the design and implementation of school feeding initiatives.
<p>2.3 Enhance resilience against natural disasters exacerbated by climate change and promote sustainable and environmentally friendly urban development</p> <p>Corresponding AU flagship initiatives:</p> <ul style="list-style-type: none"> - Global Framework for Climate Services(GFCS) Programme; - Africa Outer Space Strategy; - Blue Economy; - 2050 Africa's Integrated 	<p>a) Implement climate mitigation and adaptation measures to avoid land degradation, desertification and deforestation</p>	Japan	JICA-JAXA Forest Early Warning System in the Tropics (JJ-FAST)	Environment of forests in 43 countries will be monitored.	-JJ-FAST is now monitoring the forest changes in 43 African countries.
		Japan	Dispatch of experts and technical cooperation	Forest and land management will be improved.	<p>-Japan offered NbS(Nature-based Solution) tools and related video training materials to the developing countries including Africa for contributing to forest and land-use management, through the AP-PLAT website.</p> <p>-Japan dispatched 4 long-term experts on forest policy to 3 African countries.</p> <p>-Japan supported human resource development for legal and sustainable supply chains (LSSC) and climate mitigation measures through contribution to International Tropical Timber Organization (ITTO) and Food and Agriculture Organization (FAO).</p> <p>-Japan promoted sustainable use of forest resources and reforestation technologies in 4 African countries.</p>
		Japan	Support for water resource management to address flood and drought	Support for development of dams and irrigation facilities as well as for capacity building is provided in order to reinforce water resource management in Africa.	-In May 2020, HELP created the Principles to address Water-related DRR under the COVID-19 Pandemic and translated the document into different languages.
		Japan	Extreme weather monitoring using satellite precipitation	Strengthening early warning systems for heavy rains and drought.	

<p>Maritime Strategy (2050 AIM Strategy)</p> <ul style="list-style-type: none"> - Africa Regional Strategy for Disaster Risk Reduction; - Sustainable Land and Forest Management; - African Strategy on combating illegal exploitation and illegal trade in wild fauna and flora; - Livestock Development Strategy in Africa (LiDeSA) and Policy Framework; - Policy Framework and Reform Strategy for Fisheries and Aquaculture in Africa; 			data		
		Japan	Support for adaptation through cooperation between the public and private sector	Provide financial assistance and capacity building, including holding workshops to introduce adaptation business.	
		AU - African Risk Capacity	Support African countries to have climate disaster perils (drought, flood and tropical cyclone) parametric sovereign insurance instruments.	Climate financial preparedness plans of 10 countries are in place in three years' timeline and their climate disaster perils resilience is increased.	Since 2014 and over eight drought risk pools, ARC Ltd has paid out US \$ 66,963,313.0 million to participating countries affected by drought. And provided over US \$ 750,191,081.0 million in drought risk insurance coverage. To date, 17 countries have Certificate of Good Standing (these countries have completed all the technical requirements), enabling them to participate in ARC risk pools.
		AU-AUC	Support for participatory sustainable forest management to combat poverty and climate change	Forest landscape restoration (FLR), as a tool ensuring livelihood and food security for local communities, including women, will be promoted and implemented	Not implemented due to financial constraints
		AU-AUC	Training of Water experts	African Water Vision 2025; SDG 6 and African Agenda 2063 implemented.	Not implemented due to financial constraints
		The World Bank Group	Support for climate mitigation and adaptation in response to requests from African countries and AUC	Climate mitigation and adaptation programs under implementation	In FY22 the WB approved \$748 millions of IBRD/IDA financing for climate resilience.

<ul style="list-style-type: none"> - Great African Museum - AU strategy for Gender Equality & Women's Empowerment 2018-2028 		United Nations OSAA	Organization of events / Publication of documents	Raising global awareness and mobilizing international support to the issues	UN-OSAA organized the Africa Dialogue Series 2021. In view of the ADS 2021 broad theme “Cultural identity and ownership: reshaping mindsets”, discussions and activities were organized around three sub-themes, namely: 1. Sustainable peace for development: factoring in history; 2. Harnessing Culture and Heritage for economic transformation; and 3. Human Capital: culture and heritage unleashing the potential. The event provided a platform to raise awareness on these issues at the global level. https://www.un.org/osaa/ads2021
		United Nations OSAA	Organization of events / Publication of documents	Raising global awareness and mobilizing international support to the issues	The fourth annual Africa Day at HLPF 2021 under the theme: The Green Recovery: Renewable Energy, Digitalization and Nature-based Solutions for Inclusion and Resilience in Africa. The event provided a platform to advocate for the Brazzaville Declaration calling upon all African countries: “to redefine and develop economic models that incorporate the protection of natural resources, the promotion of renewable energies, the development of green and resilient infrastructure and inclusive digitization, informed by an awareness of the value of our human capital.” https://www.un.org/osaa/events/africa-day-high-level-political-forum-sustainable-development
		UNDP	Support access to finance and implementation for climate mitigation and adaptation programs as per African countries request	Climate finance accessed and climate mitigation and adaptation programs implemented	Ghana completed its 2nd Climate Public Expenditure and Institutional Review. A climate budget tagging operations manual for Government departments was also finalized. Namibia completed a feasibility study on the implementation of a climate budget tagging tool on its fiscus and awaits Cabinet decision on way forward. A climate expenditure classification and coding system was developed in Eswatini. Eswatini also produced a conceptual design for an online climate finance monitoring, reporting and verification system (MRV Finance). A combined disaster and climate public expenditure review is being conducted in Niger and Burkina Faso. A global green bonds training for Government and UNDP focal points was held. Due to the huge demand, 4 training sessions for Africa alone will be held in 2022.

		UNDP	Implementation of a country resilience grant in Egypt which aims to build climate security in the rural north coast and Nile Delta area specifically to enhance climate resilience of agricultural and aquaculture practices.	Enhanced climate security among rural communities through increasing and diversifying employment opportunities and income sources for women and youth, and enhanced climate resilience of agricultural and aquaculture practices.	The grant proposal was approved by the regional project board, by the country office and by the government. Discussions with potential implementing partners have progressed and are expected to be finalized in Quarter 2 of 2022. Results on the ground are expected to materialize in Quarter 3 and 4 of 2022 and in 2023.
		UNHCR	contribute to climate mitigation through sustainable energy support to those in displacement	Improve access to sustainable, safe, affordable and clean household cooking energy for those in displacement and host community	In 2021, 18 UNHCR country operations provided cooking solutions to refugees, following context-specific needs in line with cultural preferences, existing resources, environmental considerations, and supply availability. In line with the Strategic Framework for Climate Action, progress toward clean cooking access was made in 9 countries, mostly by distributing Liquefied Petroleum Gas (LPG) and piloting innovative solutions. Several countries also provided awareness-raising campaigns to refugees on energy-saving practices.
		UNIDO, Relevant ministries in the beneficiary countries (SADC and EAC Regions); Private sector associations; SACREEE; EACREEE; Regulators, power utilities and regional power pools; National standards and	Objective: contribute to improved access to sustainable energy in EAC and SADC regions and mitigate negative externalities of energy system through adoption of harmonized standards for lighting and appliances.	<ul style="list-style-type: none"> • Regional mechanism and platform established and regional policy and regulatory environment improved for energy efficient lighting and appliances in EAC and SADC regions; • Capacities of key institutions, testing centres and stakeholder groups strengthened; • Awareness among market players and policy makers enhanced; • Uptake of EELA based projects by private sector. 	<ul style="list-style-type: none"> • Regional platforms established, EELA focal points appointed from the energy ministries of each member state of SADC and EAC; • Harmonized regional MEPS for lighting developed for each of the two regions; • Over 13 regional and over 18 national consultations completed in SADC; • 3 regional and 17 national consultations conducted in EAC so far; process ongoing. • Regional MEPS for lighting approved by the SADC Cooperation in Standardization (SADCSTAN) Executive Committee; • Eastern and Southern Africa Market Assessment study for cooling appliances conducted in collaboration with U4E; • Process for the harmonization of MEPS for cooling initiated, 2 regional consultations completed; • EELA Technical Assistance and Co-Financing Facility launched; • “Business opportunities in energy efficiency energy service business models to foster energy efficiency in East and Southern Africa” report published <p>For more details: https://open.unido.org/projects/M2/projects/190108</p>

		accreditation bodies; Energy service companies (ESCOs); Academia			
		UNIDO, Commission of the Economic Community of West African States (ECOWAS) and Ministries of Energy; AECID, GIZ, EU, USAID, UNEP, IRENA, ARE, GETInvest	As follow-up of first phase in 2010- 2014, UNIDO assists the ECOW AS Centre for Renewable Energy and Energy Efficiency (ECEEEE) to adapt technically and institutionally to Strategic Plan 2017- 2021.	<ul style="list-style-type: none"> • ECREEE’s management, administrative capacities and processes responded to demands from Member States and international partners; • Technical and innovation capacities of ECREEE Secretariat and National Focal Institutions (NFIs) strengthened; • ECREEE enabled to become active member of Global Network of Sustainable Energy Centres; • ECREEE cooperates with other regional centres in Africa. 	<ul style="list-style-type: none"> • ECREEE’s internal reform in an advanced stage; • Technical and innovation capacities of the ECREEE Secretariat and National Focal Institutions (NFIs) strengthened; • ECREEE an active member of the Global Network of Sustainable Energy Centres; • ECREEE cooperates with the other regional centres on the African continent under the umbrella of the African Union. 		<p>UNIDO; Southern African Development Community (SADC) Secretariat and Ministries of Energy; GIZ, SIDA, EU, UNEP , IRENA</p>	<p>Objective: accelerate uptake of renewable energy and energy efficiency product and service markets in SADC region through the establishment of SADC Centre for Renewable Energy and Energy Efficiency (SACREEE).</p>	<ul style="list-style-type: none"> • SADC MS supported on RE&EE development; • Gender-sensitive regional policy framework established; • Regionally agreed equipment standards and equipment performance labelling scheme established; • SADC Network of certified trainers established; • Key market enablers trained on RE&EE; • RE&EE information management system established; • Regional 	<ul style="list-style-type: none"> • SADC Center for Renewable Energy and Energy Efficiency (SACREEE) is fully operational and has completed its first operational phase; • Documented progress of the SADC region towards renewable energy and energy efficiency; • Positive results of the final external evaluation; • Decision of Member States to initiate the 2nd operational phase of the centre; • Funding base for the centre diversified; • Broad range of partnerships with international and local partners established; • Broad range of activities and programmes under implementation; • Joint activities with other GN- SEC centres under implementation. More details: https://open.unido.org/projects/M2/projects/120386

				Cleantech accelerator programme for SMEs initiated.	
		UNIDO	This is a preparatory project to develop a full-scale project.	A full-scale project developed, which aims to support mainly women and youth-led early growth adaptation MSMEs through innovative and performance-based blended financing and provide bespoke technical assistance and business growth support, thereby expanding their businesses and building resilience to climate change.	A full-scale project is under development, in consultation with project partners and stakeholders.
		WFP	Food insecure people benefit from cash-based transfers, improved skills, and community assets in order to reduce vulnerability to climate related shocks and protect access to food.	Food insecure populations in areas affected by recurring climate shocks have access to adequate and nutritious food.	Reduce vulnerability to climate related shocks of targeted food insecure people by constructing or restoration of households and/or community productive assets such as water ponds, irrigation system and roads while they receive cash to purchase foods.

		WFP	Community- based asset creation activities to mitigate and adopt the impact of climate change	Vulnerable communities can better mitigate and adopt the impact of climate change, such as better soil conservation and access to water.	Soil conservation techniques such as half-moons, zai pits, deep trenches and stone bunds are used to reduce water runoff and enhance water infiltration of the soil. Assets such as wells, ponds and boreholes enable year-round access to water for irrigation and livestock. Large-scale water infrastructures such as diversion weirs and dams protect against flooding and contribute to recharging the water tables. these activities are ongoing across the Sahel region.
		NGO Little Bees International	Creating sustainable environment for community well-being	Recycling in community will be increased. Greenbelt along Nairobi river will be increased. Amount of waste in community will be reduced. Land, air, and water pollution in community will be reduced. Community well-being will be increased.	<ul style="list-style-type: none"> • Promote economic advancement for women with limited resources in Africa through recycling activities, implement reproductive health projects to prevent the spread of AIDS, and provide school supplies and a school construction project to enhance quality local education for street children in public and private founding. • Promote comprehensive education projects for education for sustainable development (ESD) in Africa and climate change adaptation and mitigation implementation such as planting trees, waste management and plastic and aluminum collection for recycling, granted by Global Environment Fund.
		ILO, and Community Road Empowerment (CORE)	Employment-intensive investments for quality infrastructure development, and more specifically: 1) addressing COVID19 crisis and drought in Madagascar; and, 2) supporting migrant and the communities of Jijiga and Kebribeyah in Ethiopia.	In Madagascar, the project links broader humanitarian and national development objectives to targeted interventions in infrastructure sector aimed at overcoming the specific disadvantages, such as poverty, drought, cyclones, faced by local communities in rural Madagascar. In Ethiopia, the project enhances disaster resilience through employment-intensive waterworks in Jijiga and refugee-	The Madagascar component officially launched in April 2022, aims to support quick socio-economic recovery by generating employment through the construction and rehabilitation of critical rural/agricultural/green infrastructure for the benefit of the drought-affected districts. The Ethiopia component has constructed seven detention ponds with embankment dams using do-nou construction technology to store water and as a structural flood mitigation measure, it has improved water supplies in target communities through installation of pipelines connected to the reservoirs, water tanks and water points. It has also constructed VIP latrines. During construction it has provided employment opportunities and skills development for refugees and host communities. It has also built capacity in Government institutions to forecast floods and use early warning systems.

				hosting communities of Kebribeyah.	
		FAO	Support the Great Green Wall (GGW) Initiative and the African Forest Landscape Restoration Initiative (AFR100)	The Great Green Wall initiative - Sahel of the AUC aims to grow an 8 000 km corridor of landscape restoration across the entire largest width of the Continent or to restore 100 million hectares by 2030 is supported	FAO technically supported AUC jointly implement the Africa Open Data for Environment, Agriculture and Land (DEAL) for Africa's GGW, using land-use data for further programming of combating desertification, land degradation, biodiversity loss and climate change; supports AUC, the Pan-African Agency of the Great Green Wall (PAGGW) and governments in the implementation of GGW through Action Against Desertification (AAD) programme, resulted in the restoration of over 60,000 ha of degraded agro-sylvopastoral lands, reaching out to more than 500 rural communities. The restoration approach and model developed are captured in a practitioners' manual for large-scale restoration supporting small-scale farming in the Sahel.
		FAO	Help prevent future pandemics through effective cross-sectoral engagement through One Health Approach	One Health Approach is promoted and mainstreamed to tackle the increasing threats to global health and socioeconomic progress posed by zoonotic diseases and towards preventing future pandemics	FAO works in collaboration through FAO/OIE/WHO Tripartite and UNEP at the human-animal-environment interface, and have proven experience and confirmed impacts in promoting and applying One Health approach; in 2021- 2022, FAO has been chairing the Tripartite at global and regional level. A key achievement of the Tripartite will be the preparation of the One Health Joint Plan of Action (OH-JPA); at the country level, FAO also collaborate to conduct needs assessments, develop in-country business plans and proof of concept, carry out targeted training and workforce development, as well as to formalize and institutionalize the national One Health platforms.
	b) Augment disaster risk reduction and management efforts	Japan	Support for formulation and revision of planning for disaster risk reduction, and human resources development	20 countries will receive assistance to launch or revise their plans for disaster risk reduction in 2 years. / Human resource development in disaster risk reduction will be provided.	- In FY2019, 32 people from 14 countries joined the training programs organised by JICA and Fire Service Organization in the field of disaster risk reduction and emergency rescue techniques. In FY2020, 11 people from 8 countries joined the online training programs conducted by JICA. - JICA supported the launch of Disaster Risk Reduction Management Platform (DRRMP) in 7 countries by holding workshops. - JICA provided assistance for launching or revising Disaster Risk Reduction Plans and human resource development programs in 20 countries in total between FY2019 and FY2020.
		Japan	Japan-Africa Public-	DRR capacity building	-The Cabinet Office of the Government of Japan along with private

			Private Seminar for Disaster Risk Reduction (DRR)	will be supported by introducing Japan's policy, technology and know-how.	companies which are JIPAD members held Japan-Africa Public-Private Seminars of Disaster Management for African Countries 5 times from Oct. 2019 to Feb. 2020. At the seminars, governmental disaster management policies and plans in Japan and technologies of Japanese companies were introduced to contribute to improvement of disaster management capacities of each country.
		Japan	Enhance resilience against natural disasters through World Bank trust funds	Technical assistance for advisory services and capacity building will be provided to African countries.	
		AU - African Risk Capacity	Support African countries to design and develop Disaster Risk Financing Policies and Strategies.	10 countries have Disaster Risk Financing Policies and Strategies in timeline of three years.	To date ARC has worked with its 35 Member States with support from AU, RECs and other key players to design, formulate and implement disaster risk financing policies and strategies as well as influence the adoption of ARC and developmental insurance on the continent in order to institutionalize disaster risk management and financing within governments and for increased uptake of ARC insurance.
		AUC	Establish continental early warning and preparedness framework and situation room for natural hazards, building on existing conflict early warning system.	Natural hazards early warning and preparedness framework and situation room established.	Owing to financial support and technical support from Italian Government and UNDRR, AUC is in advanced stage in establishing Multi-hazard early warning system and early action (MHEWS-EA) through establishment of MHEWS-EA situation room. Design of the MHEWS-EA facility and procurement of equipment is progress. By December 2021 the continental MHEWS-EA shall be operational.
		AUC	Support innovative solutions for disaster risk financing for increased enrolment of African countries in ARC risk pooling mechanism.	Disaster risk financing programme implemented.	Implementation of the ARC Replica programme, which offers humanitarian actors an opportunity to take up insurance coverage, without the obligation to replicate the country's policy, on behalf of a country.

		AU - African Risk Capacity	Strengthen science-policy interface and inclusion of youth in policy making and implementation of DRR Programmes	Operationalization of Africa Science and Technology Advisory Group (AfSTAG) and Africa Youth Advisory Board (AYAB) on Disaster Risk Reduction	AYAB and AfSATG are operationalised. Both mechanisms have developed and implementing their work programmes on youth empowerment and generating scientific evidence for policy making and implementation respectively.
		AU-AUC	Support the development of risk profiles and policy formulation in line with the Sendai Framework, as well as the strengthening of disaster risk data generation, management and reporting	55 risk profiles developed. Africa Biennial Report on DRR produced and published	16 countries have developed risk profiles through technical support from UNDRR and financial support from European Union.
		AU-AUC	Building technical capacity of Disaster Risk Management Agencies (skill development on DRR)	Training Programme implemented	This has not started due to financial constraints
		The World Bank Group	The Africa Climate Business Plan - The Next Generation Africa Climate Business Plan. Support for climate mitigation and adaptation in response to requests from African countries and AUC	provides a blueprint to help Sub-Saharan African economies achieve low carbon and climate-resilient outcomes.	In FY22 the WB approved 2.9 billions for climate adaptation and water security.

		The World Bank Group	supporting client countries and AUC to assess exposure to hazards and address disaster risks	Government better able to provide immediate support to their populations following a disaster and improved prevention.	In FY22 WB approved \$465 millions of IBRD/IDA projects
		UNDP	Support to disaster preparedness, response, recovery and resilience efforts as requested by African countries	Disaster risk management programmes implemented	UNDP built the capacities of representatives from national governments and regional organizations in the systematic assessment of COVID-19 impacts and needs as well as recovery planning. Two four-day online trainings on “COVID-19 Recovery Needs Assessment and Recovery Planning (CRNA),” organized jointly by UNDP, EU and Stellenbosch University during 17-20 November and 1-4 December were attended by 77 participants, 21 of them women, from academia, government representatives from seven Sahel countries and regional organizations. Building on above, UNDP has supported the Govts of Southern and Eastern government in conducting their CRNAs.
		UNDP	Implementation of a country resilience grant in Tunisia to enhance the capacities of second tier cities in the country to anticipate and respond to climate induced disasters, and cascade financing solutions for enhanced urban sustainability	Evidence-based sustainable and spatial planning in Kairouan, Tunisia, building on existing city development strategies	Grant launched in early 2022. Results expected to materialize on the ground towards Quarter 3 and Quarter 4 of 2022 and in 2023

		World Customs Organisation	Support for the increase in resilience of Customs administrations, which play critical role in international distribution of relief goods and in trade resumption (at recovery stage), to disasters including epidemic.	Capacity of Customs administrations to react disasters including epidemic will be increased.	WCO COVID-19 project funded by Japan held regional workshops including those for Africa on disaster management and supply chain continuity, leading to the development of WCO Guidelines on Disaster Management and Supply Chain Continuity; the project has been holding workshops to support the implementation of Guidelines, which will be also supported by the WCO- JICA joint project. Besides, WCO held regional workshops funded by Japan in cooperation with pharmaceutical companies to teach Customs officers including Africa how to distinguish fake and genuine COVID-19 vaccines and legitimate trade route of the vaccines, contributing to rapid clearance of legitimate vaccines at the borders.
		WFP	Provide advisory and technical services to Government and private sector for strengthening delivery platforms and national system of early warning and emergency preparedness systems.	Crisis-affected populations benefit from strengthened national early warning and emergency preparedness systems that enable early humanitarian action.	Government institutions and the private sector will benefit from capacity strengthening in the areas of early warning and emergency preparedness systems, safety nets programmes design and implementation and supply chain management. Local community members to be trained in the functioning of the forecasting-based funding, early warning system, and programming cash transfers in emergency situations.
		WFP	A combination of measures to assist countries to prevent climate disasters, including; climate risk insurance, climate risk reserves, forecast-based actions, and early warning and risk information.	People are better protected from the shocks or risks of climate change related hazards, as well as better informed of the risks.	1) Climate insurance: Over 1 million people were protected in Burkina Faso, Mali, Mauritania, Senegal, and The Gambia through insurance mechanisms and micro/meso insurance policies, with a financial coverage exceeding USD 30 million. 2) Climate risk reserves: 75,000 people in Burkina Faso and Senegal were supported by WFP and established small-scale savings protected by insurance, which allows them to invest in riskier but more remunerative enterprises, and agricultural inputs and technologies. 3) Forecast-based actions: Over 4,600 people in Senegal received assistance ahead of impending climate hazards, thanks to reliable and timely forecast information. 4) Climate Information: Over 29,000 beneficiaries in Niger and in Senegal received weather forecasts and climate information services tailored to their specific needs, enabling better autonomous planning and investment decisions and strengthened capacities to adapt to climate change

					impacts.
c) Improve waste management system including through measures and actions to reduce marine plastic waste	Japan	African Clean Cities Platform (ACCP) / G20 Osaka Blue Ocean Vision /MARINE Initiative	Waste management including management of marine plastic litter will be enhanced.	-Japan is supporting improvement in waste management under the ACCP.1) Provided technical support to the improvement construction work of the Hulene landfill in Mozambique.2) Organized 3rd ACCP Assembly in 25-29 July and adopted "Tunis Action Guidance for the ACCP".3) Promoted capacity development through technical cooperation project and training programs. - The "Osaka Blue Ocean Vision", shared at G20 Summit in 2019, is now expanded to 87 countries and regions, driving actions against plastic pollution. On marine plastic pollution, Japan's "MARINE Initiative" provides capacity building including harmonizing monitoring methods and policy improvement and implementation, with more than 6,000 officials trained worldwide.	
	AU-AUC	Support to African Union Member States in response to requests on Plastic waste management.	Plastic Waste management initiatives implemented. Banning Plastics Towards A Pollution Free Africa Campaign supported and implemented.	Not implemented due to financial constraints	
	The World Bank Group	address the entire lifecycle of waste—	Managing waste properly is essential for building	Implementation of the various program is ongoing. WB'S intervention is multiyear and long term scope. More concrete	

			from generation to collection and transportation , and finally treatment and disposal. Support for waste management in response to requests from African countries and AUC	sustainable and livable cities, and protecting the environment	progress can be reported in following year.
		UNIDO, Chamber of Chemical industry, Federation of Egyptian Industry, Egypt; Kenya Manufacturing Association, Kenya; Federal Ministry of Environment, Nigeria.	Objective: identification of sustainable alternative materials to plastics and innovative packaging and recycling technologies to meet market needs in Africa to reduce plastic leakage to the environment.	<ul style="list-style-type: none"> • Research on available alternative materials to plastics and packaging and recycling technologies conducted; • Studies on plastics value chain carried out; • Studies to identify gaps and needs, appropriate materials and technologies, and companies willing to introduce alternative materials; • Outreach activities to set up platform between Africa and Japan's private sector 	<ul style="list-style-type: none"> • 3 country reports on plastic value chain for dissemination of identified challenges and needs for technological solutions composed; • An online session on exchanging information on business practices between Japan and Egypt's industry conducted; • A stakeholder meeting held on plastic value chain in Nigeria, introducing Japanese technology. For more details: https://open.unido.org/projects/M2/projects/190137

		<p>UNIDO, Relevant ministries in the beneficiary countries (Botswana, Eswatini, Lesotho, Madagascar, Mozambique, Tanzania, and Zambia); GEF; UNITAR</p>	<p>Objective: achieve continuing minimization of release of uPOPs in SADC region through introduction of best available techniques and best environmental practices (BAT/BEP) for waste/biomass open burning processes.</p>	<ul style="list-style-type: none"> • Regional information on current open burning practices and establishment of uPOPs baseline inventories updated; • Legislation and human resource capacity in implementing BAT/BEP strengthened; • BAT/BEP to reduce the release of uPOPs implemented; • Knowledge transfer on BAT/BEP for replicability and awareness raising conducted; • Monitoring and Evaluation framework designed. 	<ul style="list-style-type: none"> • Over 60 people, including 25% women, participated in national stakeholder workshops; • Over 65 persons, including one third women, participated in national multi-stakeholder consultations; • In total, 348 persons, including 144 women, participated in the workshops and awareness raising activities in 6 beneficiary countries; • 3 specific BAT/BEP pilot demonstration projects initiated in Lesotho, Madagascar, and Zambia; • 14 persons (2 from each beneficiary country), including 4 women, participated in a study tour to Kigali, Rwanda; • A regional database information system created (http://stopopenburning.unitar.org/), including both national and regional sub-sites. For more details: https://open.unido.org/projects/M2/projects/150060
		<p>UNIDO, UNDP, The Niger Basin Authority (NBA)</p>	<p>Objective: to reduce pollution load in Niger River Basin water system in partnership with private sector in the basin through transfer of environmentally sound technology (TEST).</p>	<ul style="list-style-type: none"> • Niger Basin Authority's Waterbody data/inventorying processes updated; • Pollution control and regulatory framework improved; • Pollution hotspots identified and customized; • Basin-wide assessment and selection processes of pilot enterprises improved and mainstreamed; • Transfer of Environmentally Sound Technology (TEST) approach efficiently introduced; • TEST programme results 	<ul style="list-style-type: none"> • Pollution control and regulatory framework improved in 8 of the 9 countries; • Pollution hotspots identified; • Basin-wide assessment and selection processes of pilot enterprises ongoing; • Transfer of Environmentally Sound Technology (TEST) approach currently being disseminated through training of stakeholders. More details: https://open.unido.org/projects/M2/projects/140323

				and experiences disseminated.	
		UNIDO, GEF, UNEP Asia textile project, Zero Discharge Hazardous Chemical (ZDHC), Ellen MacArthur Foundation, amfori BSCI, NRDC, Fashion Pact.	Objective: promote circular economy in textile/garment sector of Lesotho, Madagascar and South Africa through reuse, recycling and conversion of textile/garment discards/wastes into economically viable products/services.	Reduce/eliminate chemicals of global concern and their waste in the environment and in processes, materials and products: 5.5 metric tons of PFOS, 4,000 POPs contaminated wastes; • Reduce/avoid emissions of POPs to air from point and non-point sources: 11.5 grams of toxic equivalent gTEQ; • 8000 persons (4,400 female, 3,600 male) directly co-benefited from the project.	<ul style="list-style-type: none"> • Stakeholders engaged: Governments, private sector, Textile and Garment Associations, Recycling companies, NGOs, Financial institutions; • Partnerships built with: UNEP Asia textile project, Zero Discharge Hazardous Chemical (ZDHC), Ellen MacArthur Foundation, amfori BSCI, NRDC, Fashion Pact, international brands and retail outlets – Levi (in South Africa and Lesotho), Puma (Madagascar and South Africa), Adidas and Woolworths (South Africa); • Discussions initiated with other potential partners from the private sector. More details: https://open.unido.org/projects/M2/projects/190323

Pillar III: Peace and Stability					
A) Focus Areas	B) Actions	C) Actors	D) Measures / Initiatives	E) Expected Outcomes	F) Result/Status of Progress
3.1 Support Africa's efforts to promote peace and security Corresponding AU flagship initiatives:	a) Support peace and security measures agreed by AU and RECs and effective implementation of peace agreements	Japan	Support for Africa's mediation and arbitration led by AU and RECs	Contribution to realize "Silencing the Guns by 2020".	- Between FY 2019 and FY 2021, Japan made a contribution of 398,192 USD through AU Peace Fund to support i) capacity building of AU, RECs/RMs and African countries on Conflict Prevention and Mediation, ii) stabilization of South Sudan, iii) quick impact project in Guinea-Bissau, and iv) activities of Panel of Wise, Pan African Network of the Wise and FemWise Africa. - For FY 2022, Japan decided a contribution of 134,032 USD to AU Peace Fund.
		AU-AUC	Support AU to fast-track its Peace and Stability efforts on	Contribution to the realization and translation of the grand	Reporting is ongoing and the report will be shared as soon as available

<ul style="list-style-type: none"> - Silencing the Guns By 2020 - AGA - APSA; - Africa Humanitarian Agency; - AU Strategy for Gender Equality & Women's Empowerment 2018-2028 			<p>the continent by conducting and popularizing its survey on Governance, Peace and Security for all African Union Member States and in the world since it is a unique initiative developed and owned by AU, however only conducted by 16 AU Member States.</p>	<p>vision of the AU Flagship Programme: 'Silencing the Guns.' Survey conducted and data disseminated. Methodology and result of the survey popularized.</p>	
		<p>UN-OSAA in coordination with appropriate UN entities</p>	<p>Advocacy and support for actions to accelerate implementation of AU Silencing the Guns initiative</p>	<p>Actions implemented by the UN Task Force on Silencing the Guns to support the AU's initiative / Renewed commitments by the international community for the AU Silencing the Guns initiative during the Africa Dialogue Series</p>	<p>UN-OSAA published an advocacy brief in April 2022 on "Stronger States for Increased Stability: Digitalization of Public Service Delivery for Peace and Security in Africa", highlighting that the weak presence of the State – including the delivery of public services – is a key contributing driver to instability and violent conflict in Africa and that enhanced digitalization of public services can reduce the risk of violence. The advocacy brief was developed to supplement the SG's biennial report on the review of the implementation of commitments made towards Africa's development (A/75/950), section E, and the SG's report on the promotion of durable peace and sustainable development in Africa (A/75/917-S/2021/562).</p>

		UNDP	Support to ratification and domestication of the AU treaties on Human Rights, Youth, Maputo protocol; Democracy, elections and governance; Rights of the Child; and preventing and combating corruption	Improved national capacity to solve challenges associated with ratification and domestication	UNDP supported the Government of Kenya to ratify and deposit the African Charter on Democracy, Elections and Governance; Mozambique, Sao Tome and Principe, Burkina Faso, and Kenya to establish National Sectoral Committee to monitor and report implementation of treaties; the African Union, PSC organized a forum for member states to reflect on Unconstitutional Changes of Governments. UNDP developed and disseminated video animations in four languages on 6 treaties: African Charter on Human and People's Rights, Protocol to the African Charter on Human and People's Rights on the Rights of Women in Africa (Maputo Protocol), African Youth Charter, African Charter on the Rights and Welfare of the Child, African Charter on Democracy, Elections and Governance, and the AU Convention on Preventing and Combating Corruption.
		UNDP	Support ,ratification, domestication, implementation and reporting of women human right instruments i (CEDAW, Maputo Protocol , ILO Convention) in the ECCAS, ECOWAS, IGAD and SADC regions covering 49 Member States	RECS have improved capacity to monitor and support their Member States on the ratification, domestication, implementation and enforcement of regional and global instruments on women's rights and gender equality	Regional Baseline Study on the Status of Ratification, Domestication, Implementation of Human Rights Instrument covering 49 Countries in 4 RECs (ECCAS, ECOWAS, IGAD and SADC). In line with the findings of the regional assessment/study, a draft training manual has been developed to provide tailored capacity building programme for RECs, human rights and treaty practitioners on treaty ratification, domestication and enforcement. The training programme seeks to enhance the capacity of the RECs, human rights and treaty practitioners to better advocate and influence member states to ratify, domesticate and report on the human rights and GEWE related instruments. The training program to be implemented in 2022 will also contribute towards establishing a pool of regional advocates on the ratification, domestication, and implementation of human rights instruments.
		UNDP	UN in support of Peace and Security in the Great Lakes Region	(i)Strengthening capacities of existing regional mechanisms within the International Conference on the Great Lakes (ICGLR) Member	UNDP, in cooperation with ICGLR and GIZ, with funding from the EU, Clingendael Academy developed a 5-day online course on Insider Mediation for Disarmament, Demobilization, Repatriation, Resettlement and Reintegration (DDR/RR). The training brought together 41 participants from ICGLR Pool of Mediators; ICGLR Youth and Women; Expanded Joint Verification Mechanism (EJVM);

				States to fulfil their mandates with a focus on Mediation/Insider Mediation applied to DDR/RR (ii) of the ICGLR Peace and Security Programme	CSOs, NGOs, and National Demobilisation and Reintegration Commissions. The training strengthened the capacities of existing regional mechanisms within the Great Lakes region and identified potential members to form the establishment of the CSOs network working closely with ICGLR in the region.
b) Reinforce institution and capacity building of central and local governments, police and judicial organs to improve rule of law, good governance, and border management and surveillance	Japan	Support for development of institutions such as electoral management, administrative system and others	Stability and reliability of institutions and governance will be enhanced.	- Japan decided in FY2021 to provide electoral support in Libya and Mali in partnership with UNDP. - Between FY2019 and FY2021, 2,271 African people attended training programs conducted by JICA in fields such as local administration, human resources management, electoral management and audit.	
	Japan	Support for peacebuilding through UN Peacebuilding Fund (PBF) and technical assistance	Institution building and human resource development for conflict prevention and 'sustaining peace' will be supported.	- Contributed 3.6 million US dollars to the PBF in FY2021, which carries out support including for institution building and strengthening social cohesion in Africa. - Between FY2019 and FY2021, JICA offered assistance to 10 countries affected by conflict through providing grant (totaling 40 billion JPY) and conducting technical cooperation projects.	
	Japan	Training of people in the areas of justice, police, security maintenance and others	60,000 personnel will be trained.	- Mobile Cooperation Team, Japan Coast Guard is providing capacity building assistance on maritime law enforcement fields to 29 officials through 12 training courses in African countries. - In March 2022, Ministry of Defense dispatched a SDF officer to a training center in Ethiopia as an instructor. - 56 African legal professionals participated in international training programs conducted by UNAFEI. - Ministry of Justice dispatched experts to several African countries to conduct research and training in the field of criminal law. - Japan supported 14 peacekeeping training centers in 13 countries, and around 9,200 people participated or are participating in training programs. - JICA provided training programs in related fields for 8,138 people between FY2019 and FY2021.	

		Japan	Organize International law training program in cooperation with the AALCO(Asian-African Legal Consultative Organization)	Capacity building in the field of international law will be enhanced.	- In 2019, Japan organized one-week Training Course on Public International Law in Japan for 12 participants from Asian-African region. - 2020 and 2021 Training Courses have been cancelled due to the COVID-19 pandemic.
		Japan	Provision of security equipment including X-ray screeners	Security maintenance, including border control, will be improved.	- In partnership with IOM, Japan supported border controls in 5 West African countries by improving public health in FY2021.- Japan provided security equipment to Mozambique to enhance border management and to police smuggling in FY2022.- For maritime security capacity building, Japan supported construction of pier and boats in Djibouti, and provided patrol boats in Mozambique and Mauritius.- Japan supported a number of projects conducted by international organisations.- In partnership with UNMAS, Japan supported Somali Police Force to enhance its Explosive Disposal Capacity from 2021.
		AU-AUC	Support AU to conduct and popularize the survey on Governance, Peace and Security for all African countries and in the world since it's the unique initiative developed by AU and conducted by only 16 AU member states.	Survey conducted and data disseminated. Methodology and result of the survey popularized	Reporting is ongoing and the report will be shared as soon as available
		The World Bank Group	Support for governance in response to requests	Governance strengthening programs under implementation	In FY22 the WB approved \$2 billions for Governance strengthening.

			from African countries		
		UNDP	Promote the de jure and de facto implementation of the UN Convention against Corruption	Enhanced multi-country cooperation to promote the effective and inclusive implementation of the UN Convention against Corruption	In partnership with Equality Now/SOAWR, UNDP conducted a regional mapping and assessment study on the status of ratification, domestication, implementation of human right instruments in the ECCAS, ECOWAS, IGAD and SADC regions covering 49 Member States in all the four RECs.
		UNDP	Institutionalize corruption prevention in key vulnerable sectors to enhance effectiveness of public administration	Institutionalization of Corruption risk management processes in key vulnerable sectors across the region	National task forces to undertake corruption risk management in specific sectors, which are key to accelerating SDGs achievement, were established in the transport and the water sectors in Tunisia, and the health sector in Morocco. The task forces have been trained and have initiated the scoping and assessment of corruption risks in priority areas. UNDP completed capacity assessments of the anti-corruption authorities in Morocco in view of providing technical assistance to support the implementation of the recently adopted national anti-corruption strategy.
		Burkina Faso	Support for the strengthening of the operational capacities of the National Police	Strengthening the operational capacities of the National Police	The national police of Burkina Faso has been equipped with rolling stock
		World Customs Organisation	Programmes to further strengthen Customs administrations' efforts to fight against terrorism at border: the WCO Security Programme	Capacity of Customs administrations, which play a pivotal role at borders, to intercept terrorism-related materials will be increased.	The WCO Security Programme has been carried out in necessary areas in Africa. For example, the Security Project in West and Central Africa, financed by the Government of Japan in until 2020, trained more than about 100 officers and provided necessary gadgets. Its control operation in early 2020 resulted in 119 seizures of various chemicals and improvised explosive devices (IED) such as 7.8 metric tons of explosive components. This project has been continued with funding from Germany. Another example is the PGS in East Africa,

			that includes the Security Project and the Program Global Shield (PGS).		financed by the JICA, trained more than 400 officers and provided necessary gadgets. Its control operation in March 2021 stopped 8.
c) Enhance peacekeeping and conflict prevention capacity of regional organizations and support African Union Member States contributing troops to peacekeeping operations	Japan	Support for African PKO Training Centers in 15 countries /UN Triangular Partnership Programme(TPP) for RDEC (Rapid Deployment of Enabling Capabilities).	Development of human resources engaged in peacekeeping and conflict prevention will be enhanced.	- From January to March in 2022, Japan dispatched JSGDF personnel to train 35 peacekeepers from Uganda, Ghana and Kenya for enhancing capacity.- In June 2022, Japan dispatched JSGDF personnel to a medical training for peacekeepers from MONUSCO, UNMISS and UNISFA.- Between FY 2019 and FY 2021, Japan made a contribution of 9,684,268 USD to support Peacekeeping Training Centers in 13 countries through UNDP.	
	United Nations, African Union Commission, African countries, other partners	The UN Office of CounterTerrorism (UNOCT) Programme Office for CounterTerrorism Training in Africa	The UN Office of CounterTerrorism (UNOCT)Programme Office for CounterTerrorism Training in Africa aims to develop and implement key initiatives to support Member States, particularly in North Africa and sub-Saharan Africa, to prevent and counter terrorism and violent extremism conducive to terrorism. It aims to increase the impact of its programmes and projects through its field	It has been inaugurated in Rabat, Morocco. It has started work to strengthen the capacity of member states through the development of National Training Programmes and Counter Terrorism training curricula.	

				presence and offer innovative solutions.	
		UNDP	Regional Project to bring together the actors supporting insider mediators and insider mediators from across Arab States. From Africa, Sudan will be included (together with Lebanon and Jordan) from the onset to design, implement and sustain a platform to support insider	(i) improving the status of insider mediation as prominent practice in Sudan (ii) develop insider mediators capacities and improve their access to enabling resources in selected countries to mediate effectively; (iii) contribute to making IM an informed, context-specific and transformative practice by developing	The initiative will be launched in Q3 2022

			mediators to sustain peace.	opportunities for peer-to-peer learning	
		UNDP	Supporting Member States to develop and implement National Action Plans on Women Peace and Security.	Meaningful and Increased participation of women in peace-building and decision making process	To support the efforts of the Regional Economic Communities to implement Women Peace and Security Agenda in their region, UNDP in partnership with the AUC-Office of the Special Envoy on Women Peace and Security is supporting rollout and implementation of the CRF through a two-pronged approach by enhancing institutional capacity of RECs to advocate for WPS and selected member States to develop and implement their NAPs. UNDP initiated the process of supporting five Member States, namely Chad, Sao Tome and Principe, Equatorial Guinea, Gambia, and Ethiopia to develop and implement their National Action Plans (NAPs) on UNSCR 1325. UNDP supported ECCAS Region in developing and adoption of the Kinshasa Declaration on Women Peace and Security.

<p>3.2 Strengthen the humanitarian-development-peace nexus</p> <p>Corresponding AU flagship initiatives:</p> <ul style="list-style-type: none"> - The African Passport and Free Movement of People - Silencing the Guns By 2020; - AU Strategy for Gender Equality & Women's Empowerment 2018-2028 - AGA 	<p>a) Provide humanitarian and development support to the most vulnerable, including disabled, elders and people in conflict situations</p>	<p>Japan</p>	<p>Provision of emergency, humanitarian and development assistance to refugees, IDPs and host communities in line with the humanitarian-development nexus</p>	<p>Emergency humanitarian assistance such as food, emergency relief goods, water and sanitation, health care and protection, as well as long-term support for self-resilience including education, employment, health/medical care, and community infrastructure will be provided.</p>	<p>- Japanese NGOs implemented 16 emergency and humanitarian projects in FY2021 as members of Japan Platform (JPF).'- Japan decided Emergency Grant Aid of 12.4 million US dollars to provide humanitarian assistance for people in the Northern Ethiopia in FY2021.- Japan supported projects conducted by international organisations in conflict-affected areas.- Between FY2019 and FY2021, JICA conducted technical cooperation projects in 2 countries for host communities and refugees.-In order to reflect the findings from the technical cooperation projects to national refugee policies, JICA dispatched policy advisors on refugee policy to the relevant ministries in the two countries in FY2021.</p>
		<p>The World Bank Group</p>	<p>Support for humanitarian - development nexus in response to requests from African countries</p>	<p>Programs to support transition from humanitarian to development assistance under implementation</p>	<p>Implementation of the various program is ongoing. WB'S intervention is multiyear and long term scope. More concrete progress can be reported in following year.</p>
		<p>UNDP</p>	<p>Regional cross border initiatives in Sahel, Great Lakes and Horn of Africa (borderlands)</p>	<p>Improved knowledge, innovative tools developed and implemented for development in Borderland Regions.</p>	<p>Over 2000 jobs created for women cooperatives and young entrepreneurs in the areas of agribusiness, vegetables gardening, diary production, soap making, leather making as part of the trade for peace initiative maigainze market refurbished to facilitate cross border trade between the Mali and Niger. Social cohesion and community security strengthened in Liptakogourma cross border areas by working with traditional authorities, women groups and local governments on peace building and mediation initiatives. Furthermore, UNDP provided support to restoring public services, socio-economic infrastructure, livelihoods and community dialogue through a regional approach focusing on the borderlands in the Sahel (Liptako-Gourma) and Lake Chad Basin regions.</p>
		<p>UNDP</p>	<p>Support to Lake Chad Basin stabilization facility</p>	<p>Enhanced implementation of Lake Chad Basin stabilization strategy</p>	<p>The Regional Stabilization Facility (RSF) developed by UNDP has contributed to immediate stabilization of areas recovering from conflict through strengthening security and safety, rehabilitation of essential infrastructure and basic social services and livelihood</p>

					support. To date, 3,001 community representatives and security actors have been trained, 4,112 essential infrastructures rehabilitated and equipped, direct livelihood-support provided to more than 29,870 people and equipment and training provided to over 27,844 (including 19 women groups). Over 70,000 IDPs have voluntarily returned to stabilized communities and cross border trade has resumed in the border between Nigeria and Cameroon. RSF has supported Governors in the implementation of the TAPs to coordinate humanitarian, development and peace actors working in their respective territories.
		UNHCR	Support for displaced and host communities	Poverty and dependence will be mitigated through participation in host country economies, and that both those in displacement and host communities enjoy shared prosperity, expanded access to employment and entrepreneurship services and decent work opportunities, and improved social cohesion.	The activities of UNHCR Somalia were, for example, done in line with the Comprehensive Refugee Response Framework (CRRF) as they aim to enhance refugee self-reliance by supporting viable livelihood activities at the household and community level. Livelihood activities supported at the household level include a) small scale businesses, entrepreneurial skills training and inputs provision, b) vocational skills training and start-up kits, c) agriculture/livestock inputs-training, seeds and tools provision. Activities at the community level include rehabilitation of public infrastructure projects such as community markets and vocational schools.

		ILO, Community Road Empowerment (CORE)	Enhancing access and skills to improve the access to water, sanitation and hygiene infrastructure s through rehabilitation of water pumps and drainage systems in informal settlements in Sudan.	Employability of vulnerable communities is enhanced; community resilience is enhanced through resilient water infrastructure that can withstand recurrent flooding; decent work principles including occupational safety and health standards are propagated in the government institutions; governments' capacity is enhanced.	in Sudan, employment-intensive construction work designs, which maximize the labour inputs of infrastructure investments, are being developed to create job and income opportunities for the vulnerable local communities without sufficient access to water for drinking and sanitation purposes; Digital (Virtual Reality) training modules on occupational safety and health are being developed in order to develop the national labour inspection capacity and provide entry points to enhanced awareness on safety and hygiene; Digital mapping of local accessibility to infrastructure assets is being developed to build the government capacity to plan and implement quality infrastructure investments. https://www.ilo.org/global/topics/employment-intensive-investment/WCMS_776667/lang--en/index.htm
		ILO, Community Road Empowerment (CORE)	Restoring access and improving resilience through employment-intensive road construction works and skills upgrading in rural areas of Mozambique in the aftermath of Cyclone Idai.	Employability of vulnerable communities is enhanced; community resilience is enhanced through resilient roads and skills to rehabilitate these roads; vocational training curricula for labour- intensive construction works are upgraded; decent work principles including labour standards are propagated in the government.	As of 26 July 2021, in Mozambique 32 youth representatives from the national infrastructure institutions are trained on the local resource-based “do-nou” technologies to deliver road construction, concrete works, and construction material testing, with decent work principles, in rural areas prone to natural disasters; Government institutions, workers, and enterprises are sensitized on mainstreaming decent working conditions, including on a safe working environment with sanitation and gender considerations; 83 trainees from the local communities, national institutions, companies and Universities are to be trained on the delivery of sealed road construction works to enhance the community resilience through the world of work. https://moztrabalha.co.mz/news/rural-roads-accessibility- and-jobs-mozambique-raj-moz-spells-out-mitigation- strategy-amid-covid-19-crisis/

		ILO, Community Road Empowerment (CORE)	Decent job creation and skills development in The Gambia through the employment-intensive approach in road rehabilitation works	Connectivity is enhanced through road rehabilitation works; Employability of vulnerable communities, including women, and people with disabilities, is enhanced through vocational training; local resource-based technology is transferred for local value chain development; an enabling business environment is created	This employment-intensive infrastructure programme in the Gambia (2018-2019) led to the following results: 250 unemployment youths (50% women, 10% returnees of irregular migration, 4% people with disability) trained on the job on local resource-based “do-nou” road rehabilitation techniques transferred by the Japanese NGO; national vocational training centre introduced the road rehabilitation techniques as a nationally accredited programme; Project participants launched two business associations and obtained two public contracts in 2020 and 2021 without external support; Rehabilitated roads are connecting fishery ports to the local market, and the highway to the tourist zones. https://www.mofa.go.jp/policy/oda/white/2019/html/stories/06.html https://www.ilo.org/global/topics/employment-intensive-investment/WCMS_735832/lang-en/index.htm https://www.ilo.org/africa/hundred/WCMS_684272/lang-en/index.htm https://www.ilo.org/DevelopmentCooperationDashboard/#b5wdush
		WFP	Food and nutrition assistance to be provided to the most vulnerable and food insecure people, including conflict-affected. (Across Western Africa region)	Food security and nutrition status remain stable with provision of life saving food and nutrition assistance.	WFP provided food assistance to 12.3 million vulnerable people across 18 countries in Western Africa region (Burkina Faso, Benin, Chad, Cameroon, central African republic, Ghana, the Gambia, Guinea, Guinea-Bissau, Mali, Mauritania, Niger, Nigeria, Sierra Leone, Liberia, Togo, Senegal, Cote d'Ivoire,) to meet their immediate food needs. This includes 4.8 million internally displaced persons, refugees and returnees in conflict affected countries.

		FAO	Building resilience of agrifood systems against the environmental and socio-economic shocks along the HDP nexus	Resilience of the agrifood systems against various shocks is enhanced along the HDP nexus	FAO builds resilience of agrifood systems and livelihoods of vulnerable communities to socio-economic and environmental shocks and stresses along the humanitarian-development-peace nexus in collaboration with stakeholders; strengthened capacities of regional, sub-regional and national stakeholders to facilitate resilience measurement for the biennial review process and the design of country level action plans to integrate migration issues into humanitarian and rural development policies and programmes; developed early warning and early action plan for rabies elimination and desert locust for countries, etc.
b) Support local integration and resilience of displaced populations and their host communities		Japan	Support measures by civil society and communities / Job creation for youth / Vocational training to promote youth employment	Prevention of radicalization of youth will be supported.	<ul style="list-style-type: none"> - Japan supported projects conducted by international organizations. - Japanese NGOs conducted enhancement and educational assistance projects to refugees and internally displaced persons in three countries in FY2021 funded by Japanese government grants. - JICA provided vocational training to almost 38,000 people between FY2019 and FY2021.
		The World Bank Group	Support to refugees and host communities through IDA refugee window.	Improve the resilience and livelihood of IDP, refugees and host communities.	Projects for a total IDA/IBRD commitment of \$1.2 billions.
		The World Bank Group	Support for increased economic opportunities to counter extremism in response to requests from African countries	Programs to increase economic opportunities, especially for youth, under implementation	Implementation of the various program is ongoing. WB'S intervention is multiyear and long term scope. More concrete progress can be reported in following year.
		United Nations OSAA	Organization of events / Publication of documents	Raising global awareness and mobilizing international support to the issues	In 2020-21, UN-OSAA secured resources from the UNPDF to implement a project on Strengthening the capacity of African Countries to design and implement policies that promote the nexus among humanitarian, development, peace and security for an accelerated implementation of the Sustainable Development Goals (SDGs). The study has been finalized and the workshops, implemented in close collaboration with UNECA and UN- OHRLLS,

					<p>contributed to raising awareness about the importance of the new way of working along the nexus at the global, regional and country levels. An online training on “Designing and implementing policies that promote the nexus between peace, security and, development to accelerate the implementation of the SDGs in Africa” was conducted. The training contributed towards raising awareness among African policy-makers as well as building capacity in the formulation and implementation of policies that reinforce the nexus peace, security, development, humanitarian and human right</p>
		United Nations OSAA	Organization of events / Publication of documents	Raising global awareness and mobilizing international support to the issues	<p>On 10-11 December 2019, UN-OSAA organized an Expert Group Meeting (EGM) under the theme: “The role of advocacy and research in breaking the silos: strengthening the nexus approach in Africa”. A study on the same theme was also prepared to raise awareness and explores way to enhance the nexus approach as well as identify potential areas on research and advocacy to amplify the voices of African stakeholders working on humanitarian, peace and development initiatives.</p>
		UNHCR	Support for displaced and host communities	Inclusion and self-reliance of refugees through development of individual and community capacities and the promotion of a conducive environment for livelihoods opportunities will be enhanced	<p>For example, in collaboration with UNHCR, government of Uganda led by the responsible sector ministries of Health, Education, Water and Environment, Gender, Labour and Social development has developed and launched the sector response plans which are aligned to National Development Plan III. These plans offer opportunities to integrate longer-term resilience and development approaches within the refugee and host population assistance. The Jobs and Livelihoods Integrated Response Plan (JLIRP) provides an entry point to development partners to support the government in ensuring that everyone in refugee-hosting districts lives peacefully with each other, moving towards self-reliance.</p>

		ILO, Community Road Empowerment (CORE)	Decent job and vocational training opportunities for young men and women, refugees, displaced persons and host communities in Mauritania are created through quality infrastructure investments with the employment-intensive approach	Accessibility and connectivity are enhanced through rehabilitated roads in the refugee-hosting community areas; Education access is enhanced through constructed classrooms in and around refugee camps; Occupational safety and health awareness during the COVID-19 crisis is enhanced.	In Mauritania, between 2019-2020, 435 young women and men (50% refugees and 50% from host communities) received theoretical and on-site vocational training on construction works, enhancing social cohesion through the world of work; 9 classrooms of a primary school are constructed; 3.5 km of track roads were constructed; 15 people from local institutions, unions, and companies were trained as trainers on occupational safety and health standards; 21 local tailors received training on protective mask manufacturing to be used during the COVID-19 pandemic. https://www.ilo.org/wcmsp5/groups/public/---ed_emp/---emp_policy/---invest/documents/publication/wcms_737315.pdf https://www.ilo.org/wcmsp5/groups/public/---africa/---ro-abidjan/---ilo-algiers/documents/publication/wcms_760742.pdf https://www.ilo.org/DevelopmentCooperationDashboard/#b5wdush
		WFP	Inclusion of displaced population in community-based resilience building activities	Enhanced community solidarity and early recovery of displaced populations	WFP includes displaced populations including refugees, returnees and IDPs to the community-based early recovery / resilience building activities where possible. Participants join the community-based participatory planning process and build community assets together which contributes to strengthening solidarities among populations (Central Sahel)
		UNICEF	Provision of health, nutrition water and sanitation, child protection and education services to vulnerable communities affected by natural disasters and conflict.	Vulnerable communities affected by natural disasters and conflict, have access to health, nutrition, water and sanitation, child protection and education services.	Improved access to health, nutrition water and sanitation, child protection and education services.

	c) Enhance dialogue, exchange of information and cooperation to address radicalism, terrorism, violent extremism, arms proliferation and international organized crime, including trafficking	Japan	Promotion of dialogue on judicial cooperation	Judicial cooperation will be strengthened through the 14th UN Congress on Crime Prevention and Criminal Justice (Kyoto Congress).	<ul style="list-style-type: none"> - "Promoting international cooperation and technical assistance to prevent and address all forms of crime" was included in the Kyoto Declaration adopted at the Kyoto Congress. Japan will take the lead in the implementation of the Declaration and support the capacity-building of the criminal justice sector. - Based on the outcome of the World Congress for Community Volunteers Supporting Offender Reintegration, held at the Kyoto Congress, Japan will promote the system in which Hogoshi (volunteer probation officers) participate in recidivism prevention efforts. - JICA continues to offer Knowledge Co-Creation Programs, and will implement technical cooperation in Kenya to promote access to justice.
		The World Bank Group	Support for increased economic opportunities to counter extremism in response to requests from African countries	Programs to increase economic opportunities, especially for youth, under implementation	implementation of the various program is ongoing. WB'S intervention is multiyear and long term scope. More concrete progress can be reported in following year.

		United Nations OSAA	Organization of events / Publication of documents	Raising global awareness on root causes of conflict and mobilizing international support to development and peacebuilding	In 2022, UN OSAA partnered with UNODC in conducting a research paper on the role of IFF on instability and crime in Africa. The study analyses IFF flow from criminal and terrorist activities across the continent and their threats to peace and security. 22-24 February 2022, OSAA in collaboration with the African Capacity Building Foundation, organized the academic conference on “Africa’s fiscal space, fragility and conflict.” The conference provided a global platform for African experts, scholars and academics to discuss and raise international awareness of critical issues under the theme, aiming at instigating relevant policy changes/improvements among African member states, which are inspired by key messages and policy recommendations emanating from presentations of studies, interventions of discussants as well as deliberations during interactive discussions. The compendium of the academic papers presented during the conference is planned to be published.
		UNDP	Support to AU action plan for prevention of violent extremism	Improved understanding of best practice and strengthened RECs technical capacities to implement continental and sub-regional PVE agenda	Two sensitization workshops have been held with SADC and national early warning centres. The second workshop focused on cross-regional experience sharing from the IGAD and ECOWAS regions.
		UNDP	Support cross-border cooperation among countries to address the spread of violent extremism as transnational phenomena.	Coordination and cooperation among countries for collective action to address the root causes of VE and build resilient border communities against VE.	The analysis has been finalized, covering communities in South Libya, North Chad, North Niger and North(-West) Sudan and North Nigeria. The report is ready in three languages (Arabic, English and French). The launching event is being prepared. This fall under the RBA-RBAS Joint initiative: Regional PVE Project for Africa and the Arab States
